Tips for A Great Show!

- The more excited you are for the show, the more excited they will be!
- Don't let the audience walk all over you, make sure you get their attention before you announce us! If they talk over you at the beginning, they will talk over us for the entire show.

Ways to get the entire audience's attention

****Ring A Bell or Tap a Glass***

- Speak loudly and clearly at the beginning, " ladies and gentlemen your attention please"
- A joke... "I've been trying to find a way to make a couple of you disappear..."
"I have announcement, to the person who is carrying a wad of hundred dollar bills in a rubber band, We found your rubber band."
- Test the audience to see which side is louder, raise your right hand for one side and your left hand to the other. Do this once or twice.
