

Interested in Auto Body Repair and/or Automotive Technology? Check out these colleges below.

Remember these 4 Things:

1. Community colleges have “**open admissions**”, this means they do not have any GPA/SAT requirements. You just have to apply and send your transcripts. You will usually receive an admissions email within a week of applying.
2. The Community College Guarantee through the state of Michigan. This makes community college **FREE** for Michigan residents who graduate from a Michigan high school in 2023 or later.
3. If you want hands-on classes only, choose a certificate program. If you don’t mind taking 3-5 general education classes (english, math, science, social studies) and want a degree, choose an associates degree program.
4. Check with your Counselor or College Adviser to see if you qualify for the **Tuition Incentive Program (TIP)**. More than 60% of WMHS seniors do. This will allow you to earn a certificate **AND** an associates degree from Michigan community colleges and universities (that have associate degree programs) or a couple of certificates.

This guide also lists colleges that have on-campus housing/dorms and an automotive related program.

***A.A.S** stands for Associate of Applied Science. Example: AAS in Automotive Technology. This means you will receive an associates degree after completing the program.*

***Cert** stands for Certificate of Achievement or Vocation Certificate. Example: Certificate in Automotive Technology. This means you will receive a certificate of achievement after completing the program.*

College/University	Program
Henry Ford College	Automotive Technology (A.A.S)
	Automotive Service (A.A.S)
	Automotive Technology (Cert)
Macomb Community College	Automotive Technology (A.A.S)
	Vehicle Engineering Technology (A.A.S)
Wayne County Community College	Automotive Service Technology (A.A.S)
	Automotive Service Technology (Cert)
Washtenaw Community College	Automotive Services Technician (Cert)
	Automotive Cybersecurity (Cert)
	Auto Body Repair (Cert)
