

JD No Code/Low Code Developer

(Automation Developer Job Description)

Location: Fully Remote / 40 Hours per Week; schedule 9am-5pm EST

Compensation: \$3000/month

Company Overview:

The company provides cutting-edge automation solutions to a range of businesses. They utilize the power of no-code platforms to streamline business processes.

Job Description:

We are looking for a great automation developer to join our team. You will work directly with clients making up to \$1+ million in monthly revenue. You will learn how to spec out, design, and build automated systems. This includes writing code, debugging, and using no code development tools. You turn the project requirements into a tangible product.

Key Responsibilities:

- Design and implement automation workflows using Make.com and Airtable.
- Collaborate with project managers to understand the client's needs and develop tailored automation strategies.
- Maintain and optimize existing automation systems for peak efficiency.
- Conduct regular testing and debugging of automation workflows.
- Stay ahead of the latest trends and advancements in no-code automation technologies.
- Provide training and support (SOPs) to clients and the team on automation builds.
- Contribute to the development and upholding of best practices in the agency.

Qualifications:

- High-level knowledge of using no-code platforms like Make.com and Airtable.
- Strong analytical and problem-solving skills.
- Excellent communication and collaboration abilities.
- Ability to work independently and manage multiple projects simultaneously.
- Experience in fine-tuning AI models is highly desirable.
- Knowledge of Python programming is a plus.

If you're interested in this role and believe you can be a good fit, please send your resume to katarina@zabota.io and we will be in touch as soon as possible.
