

UAT Protocol:

1. Intro
 - a. Thanks for your time
2. Meeting Context
 - a. Resubscribing OCL module in OpenMRS makes changes in concepts so we are going to work on a clear content review before updating concepts in OpenMRS
3. Goal for today's meeting
 - a. We will discuss how the UI will look like in the OpenMRS scene when you re-subscribe OCL module. And discuss the user experience, and feedback.
 - b. During the call, you will be given a UI to click through and I will be asking questions about your experience a few times.
 - c. The design is on desktop
4. IS it OK?
5. Ask users about their work?
 - a. how often the resubscription is done.
 - b. Are there any other pain points while using the subscription module?
6. Dive into the UI
 - a. I will guide user to walk through at the beginning if needed
 - b. Please let me know if there's something that's confusing or not clear at any place
7. Provide user with UI <https://cloud.protopie.io/p/f6e139d837>
 - a. Let User walk through the UI(it's only one way now)
 - b. So the task we are going through is check for the content review while updating subscription URL
 - i. Subscription URL is added so save changes
 - ii. Import from subscription server
 - iii. Content review Page
 - iv. Expand the changes
 - v. Confirm/Cancel
8. Any first impressions on how things are organised?
9. Ask user again to reload and go through the process on his own
 - a. Ask user to walk you through
 - b. Was there anything that confused you?
 - c. Was everything you needed accessible? What could have been better?
 - d. What do you think about the buttons?
 - e. Is there some other action that's missing or would be nice to have here?
 - f. Do you have any questions for me on what you've seen so far?
10. Ask user to again go through process without talking to you(3rd time)
 - a. How was it to use at speed?
11. Summary Questions:
 - a. What was the best thing about what you saw today?
 - b. What was the worst thing about the prototype?
 - c. If you had wishes for any change, what would they be?
12. Overall feedback on Dictionary Manager

Notes: <https://cloud.protopie.io/p/f6e139d837>

PIH do not use OCL but they use metadata sharing but helped a lot to do UAT

Any first impressions on how things are organised?

Ellen-why the whole URL is not shown?

Showing 2 concepts are changed and less focus on detail would be good, it could be 23 changes in 2 concepts, she would be more interested in concepts

Showing (%) is quite confusing just show in rows what are changed

Colour use: red is not good, blue or orange?

Was there anything that confused you?

There should be something like old and new at the top

Was everything you needed accessible? What could have been better?

Styling was not according to OpenMRS so better to follow it

<https://openmrs-spa.org/openmrs/uicommons/styleGuide.page>

What do you think about the buttons?

Buttons need to be swapped

Is there some other action that's missing or would be nice to have here?

Show some real examples because it's confusing

Summary Questions:

What was the best thing about what you saw today?

Comparison idea

What was the worst thing about the prototype?

It did not feel like using OpenMRS. Use style guide for font color and everything

If you had wishes for any change, what would they be?

Specially buttons, clear info of old and new changes, colors in row

Notes:2

1. How often do you resubscribe?
4 time by now
2. Are there any other pain points while using the subscription module?
Not updating of concepts in OpenMRS
3. Any first impressions on how things are organised?
He liked the way it is organized but color was quite confusing and seems like a danger color red
Does color means anything in the pages
Highlighting and making light and dark color
4. Was there anything that confused you?
Drop down
5. What was the best thing about what you saw today?
Comparison and UI
6. What was the worst thing about the prototype?
Color

Followup questions

Less guidance to user
