

Game name: Marina's Lunar Lagoon (Still VERY EARLY IN DEVELOPMENT)

Story: You play as Cucumber, an anxious Ferret that got lucky and won a free vacation to Marina's Lunar Lagoon, a popular water park in Hawaii that has animatronics! But everything is not what it seems... Instead of having a fun trip you are forced to work as the night guard for one week cause somebody (You) didn't read the fine print. Now with no choice you are tasked to work you & face off against animatronics that seem very curious about you!

What the game is like - With this game I really want to focus on fun gameplay beyond everything else and focus a lot on smooth movement. With the game taking place in a waterpark I want to emphasize on water movement and flow with smooth animations for everything that happens. With the game not being in 3d (somethings like environments or maybe jumpscare will be in 3d kinda like Playtime With Percy)

Gameplay Systems:

Camera- (it's a phone that's inside a ziplock bag so water doesn't touch) idk how much cams yet

Underwater Mechanic you dive underwater to fend off against some of the animatronics but be careful because you have limited oxygen and will be forced back up to breathe

Gate Mechanic - Behind you is a gate, it works exactly the same as in fnacec: requiring you to hold the lever to close the door letting go let's the gate go up, you will only need to close the door by 75% (Custom Night character will require you to fully close it) to prevent anybody from coming in. The animatronics and the Merperson go away quickly to prevent death. As well there will be a sound indicator to tell the player to close the gate

Jumpscare and the lore with them:

Since this game is light hearted, jumpscare do not kill you, the reason why you don't want the animatronics near you is because they are curious about you and your very expensive equipment. Basically they break your stuff and that is against the contract so you lose your free vacation and have to pay for everything they broke so some might say it's worse than death...

Animatronics/Characters:

Marina jellyfish animatronic based off moon jellyfish (Night 4)- Marina will work like rowen rat, you need to zapp her on a camera

Otter Animatronic Kairi

(foxy like character) (night 2) - jumps off a diving board at her last stage and you have to plunge yourself underwater or you will get jumpscared (stages stage one is chilling in a chair, second stage is stretching, third is jumping up and down on the diving board)
After you avoid her she'll go up the ladder of shame, watch her on the cameras to prevent Her from moving a stage

Monk seal animatronic **Hani**- Dive Underwater And Poke On Nose

MerPerson Eris (Gate Character) (Night 3) She is not an animatronic instead she's trying to break into the WaterPark! She appears at the gate behind you, working the same as Five Nights at Chuck E Cheese You have to hold a crank to shut the door, you only have to do it up to 75% for her to leave (There will be a sound cue that plays)

Axolotl - Capri

Must STARE AT when she appears in front of You (Night 1)

Sea Bunny Circe

Dive Underwater (Night 1)

Robo Cucumber (Custom Night character added after beating night 6) - You get a call congratulating you on you're amazing job and performance, while you were fending off against the normal animatronics in the regular nights they made a custom robot version of yourself, You seem shocked and not so happy about it but yet again it was mentioned in the contract that you signed without reading. Cucumber now has a rival and it's herself?! She works like sunny sheep, sometimes she drops her robot hat and you need to pick it up for her. She has a voice line when she drops her hat to notify the player (she has a rare voiceline that says oh my bolts which is a reference to robokoma in yo kai watch 2)

Lolbit (Custom Night Character) The lore reason why they are in this game is because Cucumber installed a mysterious app called lol which is a virus(no it is not league of legends) and now Cucumber gets ads whenever she views the camera system.If you get 3 you get jumpscared, just click anywhere on the add to get rid of it.

Angler fish [Ophelia](#)

(Custom Night Character) They Reside underwater, DO NOT PUT YOUR MOUSE ON THEM OR YOU WILL GET JUMPSCARED

Peaches (she's a dog): 100% Gate Character, You're best friend Peaches somehow followed you all the way to hawaii and wants to go swimming in the waterpark after hours, fully close the gate on her for her to leave

Nights:

5 normal Night

6th Night

7th Night Custom Night (With 4 unlockable Animatronics and all challenged all take place in the same night)

Accessibility:

Jumpscare Toggle to Disable Jumpscares

Jumpscare Volume Control (If you want jumpscare without your ears bleeding)

Subtitles - The game will have voice acting and I will be voicing Cucumber and Robo Cucumber and I have a speech impediment with R's so it's like very needed lmao
