Integrate Panopto with Brightspace

Add Panopto to your Brightspace Course

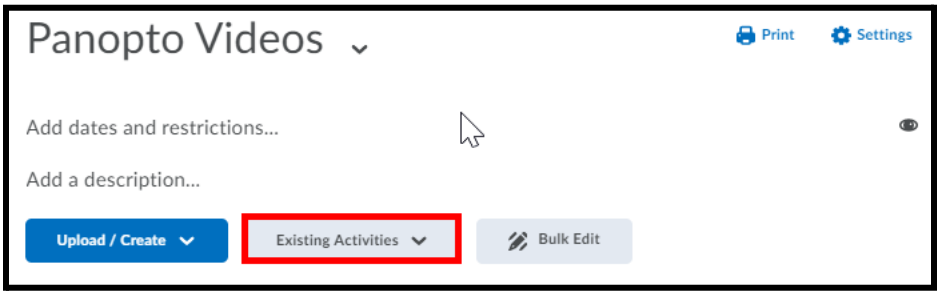

1. Log into Brightspace and access the course in which you will use Panopto.
2. Click **Content** in the navigation bar.

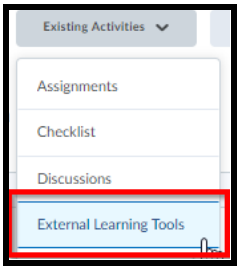

3. From the left-hand navigation, scroll to the bottom and select **Add a module**. Name the module for the Panopto tool. *In this example, we will call the module Panopto Videos, but you can title it any name.*

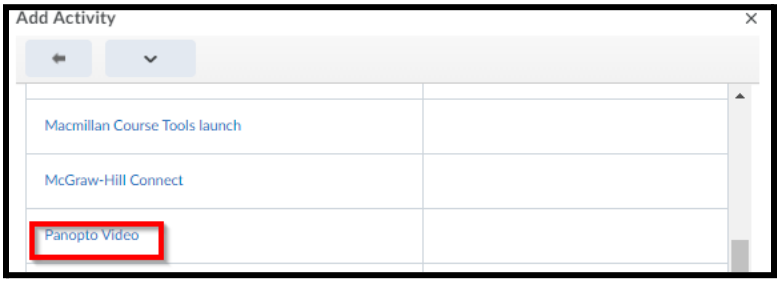

4. In the new module, select the **Existing Activities** drop-down.

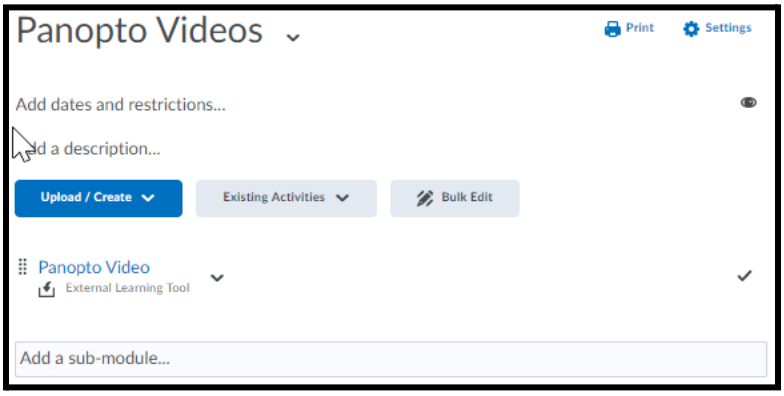

5. On the drop-down menu, select **External Learning Tools.**

6. On the **Add Activity** pop-up menu that appears, locate and select your Panopto external learning tool.

7. Your Panopto video folder for the course will now appear in the module. Students will simply need to navigate to this module and click the link within it to access the course's Panopto videos. *Students can learn how to find videos in the course by following the instructions in this article: [How to Find and View Panopto Recordings in Brightspace D2L](#).*

Note: Panopto can be added to more than one content module.
