

Major of the people in recent poll believe that there is life in outer space and the aliens are intelligent and friendly.

Many people are convinced that aliens often visit us and they are described as tall and slender, with huge heads almond-shaped eyes.

In 1947, a farmer in Roswell found a strange material and it was turned over to the army. It was called "flying saucer" and also had a story in local newspaper, but the next day the army changed what they said. Everyone forgot it.

The Roswell incident has several stories, including that there were bodies of aliens had been found. Though the government denied the story, many people believed that there still have things government doesn't tell.

People who believe in aliens gathered in Roswell to look for the mark spaceship left.

Aliens draw many people's interest. For example, stores in Roswell sell products about aliens from dolls to magnet, movies, television shows also talked about it.

Some people think it just a myth that aliens exist, but some say "we have to keep looking. who knows what's out there?"
