Fire Rescue Unit Equipment List

Introduction

A326 and H226

F216 and H356

F446

Introduction

This document is Brigade Wide issue and states what equipment is available on each Fire Rescue Unit.

A326 and H226

Mission Row and DAVIS

Equipment	Description	Image
-----------	-------------	-------

Loudhailer	For communicating instructions to a large crowd/ people at a distance. This is vital for organising Mass Decontamination of the public	
IEC	Immediate Emergency Care pack (First Aid) See LFB IEC Kit Contents Document	
Extended Duration BA Sets	Lasts around 46 Minutes at resting breathing rate. Can be used in underground rescues and where BA Crews need to deploy a lot further into a hazard zone	
Entry Control Board	Telemetry Entry Control Board	

Thermal Imaging Camera	Can detect hotspots in fires, providing visibility in zero visibility environments and can be used in Search and Rescue	
Holmatro Powershore	Heavy Duty Hydraulic Rams/ supports	
Stabfast	Vehicle stabilisation tool	

TirFor manual winch	Portable winch to be used by hand between an immovable object and what is being winched	
Floodlight	Portable Scene Lighting	
Assorted Tools	Screwdrivers Spanners Hammers Chisel Crowbar Pliers Stanley Blades Tape Measure Allen Keys	
Slip and Scotch	Can be used to stop a train from moving in a certain direction	N/a
Pneumatic Drill	With drill bits for wood and metal	

HGV Rescue Platform	Can be used as a working platform at RTCs involving LGVs/ HGVs as well as rescue platform at other incidents where it may be useful	
ResQ Airbags	Heavy lifting airbags with controller and hose lines Air supply from an EDBA Cylinder	
Steering wheel airbag restraint	Holds back the steering wheel airbag if not deployed Battery to vehicle can be cut once this is put on	
Sharp Edge covers	Goes over cuts at RTC incidents to protect workers	
Holmatro Generator Powered Spreaders	Petrol generator powered Spreaders (double force of battery operated)	

Holmatro Generator Powered Cutters	Petrol generator powered cutters (double force of battery powered)	
Plastic Blocks	Step Chock Blocks, wedges, and blocks	
K12 Circular Saw	Circular saw comes with blades for metal, wood and masonry	
Broco Cutter	Exothermic Cutter Comes with Oxygen cylinder, protection visor, cutting rods and lance	

Ring Cutter	For cutting rings on fingers and other parts of body (i.e. cock rings)	
-------------	--	---

Contaminati on Meter	Determines the level of contamination on objects and persons	
RADOS Survey Meter	Radiation detection meter	
Pressure Spray Unit	Can be utilised to decontaminate an area, or aid in Level 2 Decon	

Rubber Matting	To be utilised when setting up Level 2 Decon, and assist in Level 3	
Water Soluble Bags	To hold contaminated clothing of public Comes with zip ties	

Absorbent Pads	Pads to absorb fuel and oil leaks	
Laminated Decontamination Guides	Guides members of the public to Level 1 and 3 Decontamination and firefighters to Level 1 and 2	
Chemical Absorbent Pads	Absorbent pads for Chemicals	
Soda Ash	AKA Sodium Carbonate, this weak base alkali is used to neutralise acids (strong acids require a strong alkali or a lot of weak alkali)	

Absorbent Granules	Able to absorb chemical, water and oil spills	
--------------------	---	---

Presept Tablets	Disinfectant tablets that come with spray bottle	
Gas Tight Suits	CPS suits. EDBA Sets worn underneath with suit taped up and external DSU worn	
Duct tape	For securing the GTS	

Container	Small and medium containers	
Cable ties	To secure contaminated clothing	

Safety Harnesses	To be worn by all persons during Line Ops	
Rope Grabs	For connecting to the line and equipment	
Selection of Climbing Lines	Lines	

Tripod	For when line ops cannot take place due to lack of immovable objects	
Water/ Line Rescue Helmet	Helmet for Line Ops/ for casualties/ firefighters at RTC incidents.	
WASP Device	Warning Alert Stability Protection detects movements/ vibrations in a structure to check structural integrity	
USAR PPE	All USAR Trained Tech's PPE is stowed on FRU	
Selection of small to medium timber	For shoring up buildings alongside Timber Module	

Ceiling Support Jacks	Supports a ceiling/ roof	
Snake Camera	Able to be deployed into a danger zone in search of life	

F216 and H356
El Burro and Vespucci

K12 Circular Saw	Circular saw comes with blades for metal, wood and masonry	
Broco Cutter	Exothermic Cutter Comes with Oxygen cylinder, protection visor, cutting rods and lance	
Ring Cutter	For cutting rings on fingers and other parts of body (i.e. cock rings)	

Emergency Rescue Boat	Inflatable boat with optional outboard engine Comes with: Outboard Engine Engine Fuel and Oil Paddles White Navigation Light To be inflated by EDBA Cylinder	
Dry Suits	For every member of the crew	
Personal Flotation Device	For every member of the crew	
Water/ Line Rescue Helmet	For every member of the crew	
Wading Pole	Wooden pole for sweeping for debris in flooding incidents	
Water Rescue Throw Line	For shoreline rescues	

Inflatable Rescue Path	For rescues in mud, and on waterways	
------------------------	--------------------------------------	---

WASP Device	Warning Alert Stability Protection detects movements/ vibrations in a structure to check structural integrity	
USAR PPE	All USAR Trained Tech's PPE is stowed on FRU
