pages_messaging

[Tell us how you're using this permission or feature]

This app is developed for a WordPress plugin. The plugin allows me to set up a ChatBot that responds to visitors messages on my Facebook page.

Step-by-step instructions:

1. Important notes about the Chat Bot:
- Bot responds between 1-3 seconds after your message
- Bot has been programmed with only the basic words and buttons (Hi, Hello, Help, Info, Menu).

2. Visit the Facebook page that I integrated with this App

3. Interact with the page using the "message us" button.
