

Tools Ready To Use

*In this folder we are aggregating for the benefit of the community the best tools and applications freely available on the internet that we think are useful or those that are being used and developed in the Divvy Community for networking and within Divvy Projects. Divvy does not warrant, advocate, promote or in any way guarantee the functionality of any tools made available here. Divvy does not favor any tool over another and does not benefit in any way from making these tools available other than to support you the user. Please feel free to go to the bottom of this list to **Suggestions From The User Community** and enter any freely available application or process that you would like the community to be aware of and add any comments. You may also highlight any tool in the Toolbox and use the Comment function to add your thoughts as to the functionality of these tools as you use them. **We may use your comments to improve the platform of Tools Ready To Use for the benefit of all.***

Tools Ready To Use

Community Documents

[Divvy: Pilot Community Manual](#) lays out how Divvy serves the community and links to other key Divvy documents . See also the [#document-collaboration](#) channel in slack.

Decision Support Tools

Divvy Slack

Divvy is using Slack as its community discussion forum providing multiple channels including general, decision-support, proposals, personal, and more than 12 other channels. Join DivvyDAO Slack [here](#).

Divvy consider.it

This is a consensus platform where you can view projects, propose projects, and get involved with projects in progress. Most Divvy Projects are on consider.it. Gain support for your idea and bring it to the point of critical mass with community support.

Divvy Democracy OS:

You can make proposals here with arguments and replies, show support for arguments, and vote on proposals. Signup at [democracyos.org](#).

Divvy Loomio:

Here you can start discussion threads where you can make proposals and state positions. Invitation link

Johari Window: https://en.wikipedia.org/wiki/Johari_window

The **Johari window** is a technique^[1] used to help people better understand their relationship with themselves and others, which was created by psychologists Joseph Luft (1916–2014) and Harrington Ingham (1916–1995) in 1955. It is used primarily in [self-help](#) groups and corporate settings as a [heuristic](#) exercise.

<https://www.mindtools.com/CommSkill/JohariWindow.htm>

The ultimate goal of the Johari Window is to enlarge the Open Area, without disclosing information that is too personal. The Open Area is the most important quadrant, as, generally, the more your people know about each other, the more productive, cooperative, and effective they'll be when working together.

Suggestion: Add to Decision Support Tools.
