### Abstract

This electronic document is the template for the manuscript for Journal of Engineering Technology Access (JETA). All contents should be replaced by the real materials but do not change the format here. This template must be strictly followed in order to the manuscript to be considered for publication in JETA. English abstracts are required; the length of each should not exceed 25 lines.

**Keywords:** About; Four Key Words or Phrases; In Alphabetical Order; Separated by Semicolon.

### I. INTRODUCTION

The Journal of Engineering Technology Access (JETA) (ISSN xxxx-xxxx, eISSN xxxx-xxx) is a refereed journal published by Nakhon Phanom University, Thailand.

High-quality papers for Journal of Engineering Technology Access (JETA), are now invited for submission. Interested authors should read the 'Instructions to Authors' section for all details of requirements, procedures, paper mechanics, referencing style, and the technical review process for submitted papers.

Papers should be submitted online through JETA Online Submission at <https://ph02.tci-thaijo.org/index.php/NPISTJ> and other requirements should be followed as in the Instructions to Authors. There will be no strict publication schedule. As soon as they are ready, successful papers will be posted in sequence in the JETA.

### II. MANUSCRIPT PREPARATION

The manuscript article should be written in English in the font of Times New Roman, which includes the following: abstract, introduction, literature review, objectives, research methodology, theory, testing and analysis, results and discussions, conclusion, acknowledgement and references. Manuscript should be prepared via the Microsoft Word.

#### A. Title, Authors Name & Affiliation

21 mm The manuscript title should be centered across the full page with the first letter of each major word in capital letters. Title should be typed using 12-font size, Times New Roman. Author name(s) should be typed using 12-font size, Times New Roman. Author(s) affiliation and address information should be *Italic* in 14-font size, Times New Roman.

21 mm

#### B. Figures, Tables, Charts & Diagrams

Figures, tables, charts & diagram should be kept to a minimum. They can be in black and white with minimum shading or colored with high visibility. Do not use color unless it is necessary for the proper interpretation of your figures. If you want reprints of your color article, the reprint order should be submitted promptly and numbered consecutively. They should have a brief

title/caption in a font size of 10.

**Figure 1.** Example figure

### III. MATH AND EQUATION

If you are using *Word*, use either the Microsoft Equation Editor or the *MathType* add-on for equations in your paper “Float over text” should *not* be selected.

Number equations consecutively with equation numbers in parentheses flush. First use the equation editor to create the equation. Use the table format as shown below:

$$Z = x + y \quad Z = x + y \quad (1)$$

where:  $Z$  = Zero force  
 $x$  = Mass of the object  
 $y$  = Power of the object

Be sure that the symbols in your equation have been defined before the equation appears or immediately following. Italicize symbols ( $T$  might refer to temperature, but  $T$  is the unit tesla). Refer to the equation as “Equation (X)” where  $X$  is the equation number.

### VI. CONCLUSION

A conclusion to review the main points of the paper, do not replicate the abstract as the conclusion. A conclusion might elaborate on the importance of the work or suggest applications and extensions.

### APPENDIX

Appendixes, if needed, appear before the acknowledgment.

### ACKNOWLEDGMENT

Sponsor and financial support acknowledgments can be mentioned here.

### References

References in the article use square brackets, for example [1]. The reference numbers must be sorted from small to large numbers correctly. References to numbers in the sequence of correspondence are used in the following format: [1-5] printed according to the APA standard format, In which the title of the article cited must be clearly specified keep the reference list in line with the example. By spacing from the left edge to match all items.
