

SL: Delphine I have to tell you something

Hey Delphine,

After analyzing your business I came up with an improvement for what could be one of Plantes et Parfums' most important aspects.

The ability to attract new clients.

And even though your website has awesome content, and I liked your newsletter, if new strategies aren't implemented often it may risk going stale.

So I came up with a strategy to improve your business ability to attract new clients using internet presence as his focal point.

Would you like to know more about this strategy?

P.S. I could also send you some work I did for some previous companies I worked with if you want.
