

Privacy Policy

App Name: Roselune

Last Updated: March 10, 2026

Contact: roselune@gmail.com

1. Overview

Roselune (“we,” “our,” or “the App”) is a romantic photo-atmosphere editing application for iPhone. This Privacy Policy explains how information is handled when you use the App.

Protecting user privacy is a core design principle of Roselune. **All data created or stored within the App remains on your device.** We do not operate servers, collect personal data, or transmit information outside your device.

2. Information We Do Not Collect

Roselune does **not collect, store, transmit, or process** any of the following information:

- Personal identifiers (such as name, email address, phone number, or physical address)
 - Location information
 - Device identifiers or advertising IDs
 - Usage analytics or behavioral tracking data
 - Crash reports sent to our servers
 - Any content contained in your photos, voice recordings, or written notes
-

3. Data You Create and Local Storage

All content created within Roselune — including memory titles, notes, place names, mood dates, edited photos, and voice recordings — is stored exclusively on your device in the following locations:

- **Realm database** within the app's sandboxed storage (for memory records)
- **Documents/Roselune/photos/** for processed image files
- **Documents/Roselune/audio/** for voice memo files
- **NSUserDefaults** for app preferences and in-app currency balances

This data does not leave your device unless you explicitly choose to share it using iOS system sharing features.

4. Camera, Microphone, and Photo Library Permissions

Roselune may request access to certain device capabilities solely to enable core features of the App.

Permission	Purpose
Camera	Capture a new photo for editing in Studio
Photo Library	Select an existing photo to edit
Microphone	Record a short voice note attached to a memory

These permissions are requested **only when you choose to use the relevant feature**. The App does not access these resources in the background. All media processing occurs locally on your device and is saved in the App's Documents directory.

5. Face Data

Roselune allows users to edit personal photos, including portraits and couple photos, by applying romantic color filters and atmosphere effects. For transparency:

- **We do not collect face data.** The App does not use facial recognition, face detection, or any facial analysis technology.
- **We do not process face data.** Image processing is limited to visual effects such as color overlays (rose, lavender tones), glow, and warmth adjustments.

- **We do not store face data.** Edited images are saved locally as standard JPEG files without facial metadata.
- **We do not share face data.** No image data is transmitted to us or to third parties.
- **We do not retain face data.** Because it is never collected, no facial data is retained.

App Review — Face Data Responses

Question	Answer
What face data does the app collect?	None
Purpose of face data collection?	Not applicable — no face data is collected
Is face data shared with third parties?	No
Where is face data stored?	Not applicable
How long is face data retained?	Not applicable — never collected
Where is this disclosed in the policy?	Section 5 — Face Data

6. In-App Purchases

Roselune offers optional in-app purchases of “**Petals**,” a virtual currency available through Apple’s App Store using StoreKit.

All purchase transactions are processed by Apple. We do not receive, store, or process payment card information or billing details. Your Petals balance is stored locally on your device using **NSUserDefaults**.

For details about Apple’s payment privacy practices, please refer to Apple’s Privacy Policy.

7. Third-Party Frameworks

Roselune uses the following third-party framework:

- **Realm (MongoDB)** — used solely as an **on-device database** for storing memory records.

Roselune does **not use Realm cloud synchronization or Atlas Sync**, and no data is transmitted to external services.

The App does not integrate advertising SDKs, analytics tools, social login services, or crash reporting platforms.

8. Children's Privacy

Roselune is not directed toward children under the age of 13.

Because the App does not collect personal data from any user, no personal information from children is stored or transmitted. If you believe a child has used the App in a manner that raises privacy concerns, please contact us at **roselune@gmail.com**.

9. Your Rights

Since all data remains on your device and no personal data is collected:

Access and Deletion

You may view and delete memories, photos, and voice recordings directly within the App. Deleting a memory will permanently remove its associated media files.

Data Portability

Your data resides entirely on your device and may be backed up or transferred using standard iOS mechanisms such as iCloud Backup or Finder/iTunes backup.

Permission Control

Camera, microphone, and photo library permissions can be revoked at any time in **iOS Settings** → **Roselune**.

10. Data Security

All data is stored within the iOS sandboxed file system and Realm's local database environment. Security protections rely on iOS system safeguards such as device encryption, passcode protection, Face ID, or Touch ID.

We do not have access to your data. Data protection ultimately depends on the security settings of your device.

11. Policy Updates

We may update this Privacy Policy periodically. Any changes will be reflected by updating the **"Last Updated"** date at the beginning of this document.

Continued use of the App after such updates indicates acceptance of the revised policy. For significant changes, notice may be provided within the App.

12. Contact

If you have questions regarding this Privacy Policy, please contact:
