

# MODULE 4

## Automation Engine Recommended Tools & Apps

---

So that you can focus on the video and not need to take notes like crazy, we've made you this cheat sheet of some of the tools recommended in this module.

This list is not exhaustive for a reason.

Always remember the process and system is more important than the tool. Less is more. If a tool will save time or money, use it. If not, it will clutter your system.

*As always, if a Q comes up, let us know via email/ helpdesk at [support@sylviemccracken.com](mailto:support@sylviemccracken.com) or on the group calls!*
