

-The new system for downloading PicoSoft is ridiculous. Sorry. Here is the process...

Note: this appears to not work with IE11, despite the site's suggestion to add it to compatibility view. You'll need to use a different browser.

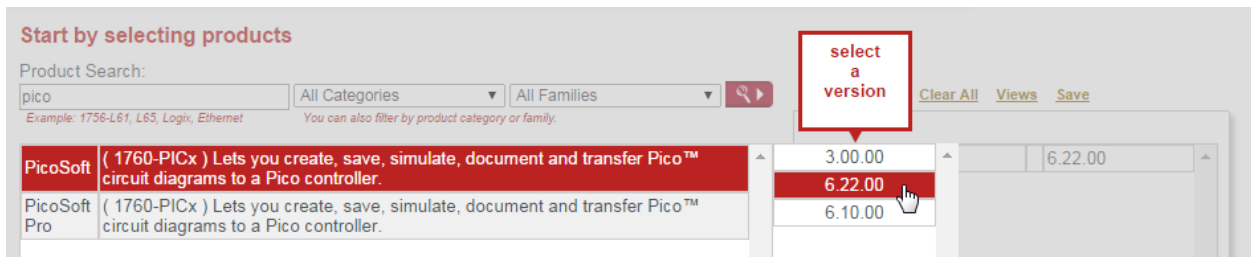

**Step #1:** Visit this site:

<https://compatibility.rockwellautomation.com/Pages/MultiProductDownload.aspx?keyword=picosoft>

**Step #2:** Become a member

Find the **Become a member** (TOP RIGHT CORNER) link and fill out the form. There is no point in trying to do anything without being logged in.

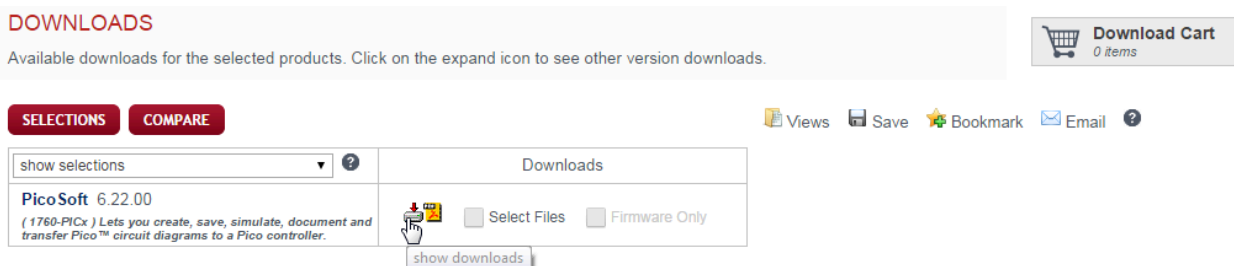

**Step #3:** Get back to the site above, but as a logged in member. Then search for **Picosoft** in the "Product Search:" box. It should find two hits, PicoSoft and PicoSoft Pro. Select the **non-Pro** version, then select the newest version. At present 6.22 is the newest version.

**Step #4:** Click on the "Downloads" button

**Step #5:** Click on either the Show downloads link (as shown below) or the checkbox for Select Files (the checkbox is probably better).

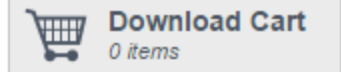

**Step #6:** Add this file to your Downloads cart by checking the box or clicking on the text (again I'd probably just check the box, but the click here works too)

## Available Downloads

Product Selected: **PicoSoft**

Product Version: **6.22.00**

### General

Download Software Updates

### Accessory Files

PicoSoft Software V6.22.00

CLOSE

**Step #7:** Click on “**Download Cart**” which should now have 1 item in it. Then in the popup click on **Download now**.

Download Cart Multi Product Selector > Find Downloads

	Download Item	Version	Release Date	Release Note	Download Size	Comments
<input checked="" type="checkbox"/>	PicoSoft Software V6.22.00	6.22.00	09/17/2013		40.54 MB	

CLEAR 1 items **DOWNLOAD NOW** **CLOSE**

**Step #8: Agree to the terms then click **Direct Download****

**Managed Download**

Benefits of managed download

- Secure
- Verify file integrity
- Automatically resume download file if error occurs due to lost connections, network problems, computer shutdowns, or unexpected power outages

**Direct Download**

Use your browser or third party download manager. Rockwell Automation is not responsible for the file integrity of your download.

---

**General Information** | **Technical Support**

The Rockwell Automation electronic software delivery service uses a managed download process to ensure fast and reliable delivery of software products. This service includes:

- A global network of high-speed Internet servers
- An advanced download manager that is capable of downloading multiple items simultaneously
- A sophisticated file compression algorithm that reduces the footprint of some products by 60% or more

This should bring up a page to finally let you download the file. The file you get is a .exe, run it to extract the contents to the location of your choice. Extract that .zip which will give you another .zip to extract. **Really?** The .zip just extracted to give me another .zip? **Yes.**

**Step #9:** Extract the **PicoSoft\_V6.22.zip** (this is the file we've always wanted) to wherever you like.

**Step #10:** Now you should have a setup.exe file. Run it! The rest should be easy and match the video now.

Sorry the process is so much extra trouble now compared to what the video did.
