Received: dd mm yyyy

Accepted: dd mm yyyy

Published: dd mm yyyy

## Abstract

Abstract should contain research purposes, explanation of short research methodology and obtained results. The abstract should not exceed more than 250 words. (*Font 10*)

---

## 1. Introduction (*Font 14*)

In this section, author(s) should include the main reasons/background of selecting the research topic. Author(s) should also describe the literature review which containing other previous related research's outcomes including author(s) related previous research (State of the art and novelty). The referencing method is exclusively following the IEEE referencing standard such as [1].

Supporting theory may also be included in this section. (*Font 11*)

## 2. Research Methodology

### 2. 1. Method (Sub Heading 1)

In this part, author(s) should demonstrate the selected method including time and location where the research is mostly conducted (if necessary)

### 2. 2. Figure and Table (Sub Heading 2)

Sometimes, research methodology is demonstrated in form of diagrams or tables. Author(s) should ensure that those diagrams and tables are clearly readable if placed in one column, however, if the diagrams or tables require more space, the diagrams or tables can be placed in two columns, but it should still be confirmed in balanced forma

3. Results and Discussion

In this section, author(s) must express and show the obtained results of his/her/their research whether it obtained from laboratory-based research or simulation results. The results can be in figure, diagram, or table which is in turn must be followed by comprehensive explanation. Figures or Tables must be numbered in sequence. Example of Figure and Table can be seen as follow:

FIGURE 1. Simulation result (*Font 11*)

Every figure and table must be cited and explained in the main text. Authors may either (1) refer to the item by number (e.g., “see Figure 2,” “Table 1 presents...”) or (2) describe its content directly—either approach is acceptable. Displaying a figure or table without accompanying discussion in the text is not permitted.

TABLE 1. Collected Data (*Font 11*)

| Column Header Goes Here | Column Header Goes Here | Column Header Goes Here |
|-------------------------|-------------------------|-------------------------|
| Row Name Here           | x                       | x                       |
| Row Name Here           | x                       | x                       |
| Row Name Here           | x                       | x                       |

All equations must also be numbered in sequence where the number is placed in parentheses.

$a \times b$  • ■

## 4. Conclusion

Conclusions are written in this part. Simply using format of point 1, 2, etc. In this part suggestions can also be included Etc.

## Acknowledgements

Acknowledgement can be applied for bodies which have given very positive contributions in conducting the research such as sponsorship, etc.

## Data Availability Statement

Inclusion of a data availability statement for transparency is preferred for this journal.

## References

References style would be in IEEE standard as shown below. It is strongly recommended that author(s) use Endnote or Mendeley software in managing the IEEE referencing format.
