

I tend to forget a lot of characters I like if I'm not actively fixated on their media, so this list mostly just serves as a way for me to remember characters that I like.

The fandoms are in no specific order, however any character in bold are ones that I like significantly more than unbolded ones. I also generally try to list the characters in order from most strongly liked to least strongly liked, but it's not guaranteed/subject to change, so take it lightly.
