

Peter Who

The Right's attacks on DEI, clearly seen by the replacement of the single black man and single white woman on the joint chiefs with Tighty whitie males of far less experience or ability. Mr. Trump and his band of miscreants believe that non white people and women are taking away jobs from more highly skilled white men. At least in the Military, the exact opposite is happening.

Both General Brown and Admiral Franchetti, the lone female at that high level, who was head of naval operations, had 40 years of experience. Like General Brown, Admiral Franchetti had truly massive amounts of experience.

Brown's replacement Lt. General Caine major selection criteria was he was a Red hat Trump Brownnoser. That literally was his chief selection criteria. In every other way and for any other president he would not have been selected. At best he has 20 percent of the experience of General Brown. Totally NOT qualified to sit at the head of the joint chiefs.

Quite frankly having a purported alcoholic womanizing news reporter as secretary of defense would not be on anyone's list either, except perhaps a narcissistic dictator, for a totally random example. Mr. Hegseth should not be anywhere near the Pentagon.

The Trump administration is filled with people whose major qualification is that they will do whatever Trump wants. These people are not even the B Team. 80 percent of Trumps cabinet are prime examples of the Peter Principle.

That is where employees are promoted based on their success in previous jobs until they reach a level at which they are no longer competent. In many cases we have foxes guarding the hen houses of governmental departments. That is the Trump White House in a nutshell.

Doge Elon envisions himself as a wise benevolent ruler. He is anything but. He is just another example of the Peter Principle. His car company has lost 38 percent of its value since mid December. In part because much of the worlds adults sees Mr. Musk is just another sociopath who wants to be king. He really does not have an upside. Which is sad.
