### **November Maintenance Report**

- We have been fortunate that we have just had routine general maintenance calls this month.
- As part of our routine maintenance and inspections, I had the areas fixed on the roof at Goza and Peake that were identified in the inspection reports. Again, this is more of a preventative maintenance to hopefully catch minor problems before they turn into major issues.
- We have had two more windows broken at Peake. This is the fifth and sixth window that have been broken by kids throwing rocks.
- I am in the process of replacing the basketball entrance doors at AHS to comply with ADA requirements.
- I am also in the process of replacing 3 sets of doors at the maintenance shop. The frames have deteriorated to the point they have to be replaced in order to just secure the building.
