

Privacy Policy

Ez Harp: Chord Autoharp

Developed by Mookiebearapps

Effective Date: June 10, 2026

Overview

Ez Harp: Chord Autoharp ("the App") is a musical instrument application developed by Mookiebearapps. This Privacy Policy explains what information the App does and does not collect, and how your data is handled.

The short version: Ez Harp does not collect, store, or transmit any personal data. It has no analytics, no advertising, no account system, and no internet connection.

Information We Do Not Collect

Ez Harp does not collect any of the following:

- Personal identifiers (name, email address, phone number, device ID)
 - Location data
 - Usage analytics or crash reports
 - Audio recordings or microphone data
 - Financial or payment information
 - Any data transmitted to Mookiebearapps or third-party servers
-

Information Stored Locally on Your Device

Ez Harp stores a small amount of data locally on your device using Android SharedPreferences. This data never leaves your device and includes:

- Your last-used chord set (e.g. "C, F, G, Am")
- Any custom chord sets you have saved
- Your selected instrument sample name or file path
- Your SoundPool stream size preference

This data is stored solely to restore your preferences the next time you open the App. It is not accessible to Mookiebearapps or any third party.

Custom Audio Files

Ez Harp allows you to load custom audio files from your device as instrument samples using Android's Storage Access Framework. When you select a file:

- The App requests read access to that specific file only.

- The file is loaded directly into memory for audio playback.
- No copy of the file is made by the App, and no audio data is transmitted externally.
- A persistent URI permission is stored locally so the App can reload your chosen sample on next launch.

The App does not access, scan, or index any other files on your device.

App Permissions

Ez Harp requests the following Android permission:

READ_EXTERNAL_STORAGE / Storage Access Framework

Used only when you explicitly choose to load a custom audio file via the “Change Sample” menu. The App does not access any files without a direct action from you.

Ez Harp does not request permissions for the microphone, camera, location, contacts, or network access.

Children’s Privacy

Ez Harp does not collect any personal information from any users, including children under the age of 13. The App is compliant with the Children’s Online Privacy Protection Act (COPPA). Because no data is collected or transmitted, Ez Harp is safe for use by children of all ages.

Third-Party Services

Ez Harp does not integrate any third-party SDKs, advertising networks, analytics services, or social media plugins. There are no in-app purchases and no payment processing within the App.

Changes to This Policy

If this Privacy Policy is updated in the future, the revised policy will be posted at the same URL with an updated effective date. Continued use of the App after any changes constitutes your acceptance of the revised policy. Given that the App collects no data, material changes to this policy are unlikely.
