

[Here are the points earning rules for Yellowdig discussions.](#)

----->*Please do not use AI to write posts.*<-----

All posts must use a 'Topic' from the pulldown list in Yellowdig, e.g., **Week 8**.

**Week 8: Please choose from the following discussion questions**

1. What is a system trap? What are some examples of system traps that you see operating in the world? e.g., rule beating, escalation, success to the successful... (Meadows Ch 5)
2. What insights did you get from Ford's SD model of the carbon cycle with respect to climate change? (Ford chapter 23)
3. What are some of the results from the Handy model? What were your impressions of the model? Useful or not? What are some of the model limitations? (HANDY SD model)
