What is Obvious to You!

As seen in the above, what is obvious to you, may not be obvious to others. What might be some simple creative ideas, materials, resources, or strategies that can engage and enlighten your students and support their learning?

For further Potentially Obvious, Possibly Brilliant tips, see:

<https://www.jigsawlearning.ca/publications/blog-posts/potentially-obvious-possibly-brilliant-daily-notes-and-ideas>

<i>Playing Cards</i>	For fine motor, challenge kids to make card houses.
<i>Popsicle Sticks</i>	- Spoons (this game) but instead of playing cards use popsicle sticks with pairs of sight words written on them. - Kaboom game (here) I especially like using the giant popsicle sticks.
<i>Old Marker Lids</i>	Save them off of dried markers and they make great art and math manipulatives.
