Academic Assistance Learning Acceleration School Year Program

Dear Parent / Guardian,

Beginning on Monday, October 9, 2023, the District will be offering after school academic assistance in English, Mathematics and Science through the Learning Acceleration School Year Program. The goal of this program is to provide additional academic support to students who are struggling in these subjects.

Students participating in this program will receive additional academic support from a certified RIH teacher after the school day and according to a weekly schedule. Each after school session will be limited to four students, with different content areas and courses spread out throughout the week.

Students in need of after school academic assistance can [sign up](#) through the district and schools' websites under the Academics drop down menu ([Learning Acceleration Program](#)). We ask that students sign up for academic assistance at least the day before for planning purposes. Please be prompt when attending your after school session. Teachers will only wait ten minutes for students to attend at the start of the session. Finally, sessions may be face-to-face and / or virtual. The meeting arrangements are specified on the sign-up page and any further questions can be emailed directly between the teacher and student.

The District hopes that students find this program helpful to support their learning needs and meet their academic goals. If you have any questions about the schedule or the registration process, please contact the Curriculum Office ([curriculumoffice@rih.org](mailto:curriculumoffice@rih.org) or 201.416.8100 ext. 3819). Any other questions can be directed to your guidance counselor.

Thank you,

Elizabeth McDermond

Director of Curriculum, Instruction, and Articulation  
Ramapo Indian Hills Regional High School District
