

Tulajdonságok:

Base on CAF CM sources

Linux source 3.4.65

4.8.2.130902 compiled with Linaro Toolchain

O3 support with custom build flags

msm_hotplug hotplug driver

auto_hotplug: rev 4

arm: mako_hotplug: Import from franco kernel

dyn fsync off

Faux Sound Control

Faux Speaker Amp Control

LCD Color Pprofiles

Custom Voltage Control Interface

Force USB Fast Charging

Init.d support

FSYNC on/off

Advanced Gamma Control

Vibrator Strength

Sweep2Wake and Sweep2Lock

msm_otg: hack to allow externally powered usb host mode

Governor tweaks

Touch Boost (thx francisco franco)

Thermal revised

Krait retention

Led Control

Multicore Power Saving

Factory 100mv UV

192 Mhz frequency for better battery when idle

Screen Off Freq. limited to 702 (saves some battery)

Many, many additions under the hood

CPU freq table

- 192, 384, 702, 1026, 1242, 1350, 1512

GPU freq table

- 27, 128, 200, 320,- 400

CPU governor table

- Ondemand, Intellimand, Interactive, Conservative, Wheatley, Performance

I/O Scheduler table

- Cfq, Deadline, Row, Noop

TCP Control

- Westwood, Reno, Bic, Cubic, Htcp

Yandi v01

Add kexec-hardboot support (dualboot)

Change Slab allocators to Slub allocators (4.57 ops/sec => 86.26 ops/sec)

Tweaking the scheduling

Yandi v02

Added CPU Governor: Ondemand, Performance, Simple, Interactive

crDroid~edition

1.42

3.4.66 linux kernel update

Added Intelli-terminal

GPU conservative: Update thresholds

touch: Hacky solution for unresponsive screen (Sweep2Wake)

Added Sio I/O Scheduler

CPU default I/O Scheduler: Cfq

MP-Decission Off by default

BLX Support for Battery Life eXtender

Added Userspace Voltage Control

Yandi v03

Wifi fixed

Optimizations

Linux 3.4.68

Build with arm-linux-androideabi-4.7 from AOSP 4.4

Lots of changes

Default Governor intellidemand

Yandi v07

Back to old prima driver !

Removed BLX

Removed a few TCP mode

Added IPV6 subtrees

Enabled kernel debug option

Temp limit 85 > 60

Removed fiops, sio, sioplus, vr i/o scheduler

Added zen i/o scheduler & make default

Added wheatley governor

Changes auto_hotplug to msm_hotplug

Added cgroup timer slack

Yandi v09
