Taming Method

To get yourselves one of these big sleepy bois you're going to have to wait for them to go to sleep. Don't worry it shouldn't take them long given how lazy these titanic toddlers are.

Once asleep just go up to the big fella and passive feed it sweet veggie cakes or exceptional kibble (Level 85 required to feed). They are fussy fellas and won't accept any other foods. They also eat quite quickly (roughly every 15 seconds).

Then you just feed them until they tame! Easy peasy, though be warned sometimes feeding them will wake them up (5% chance), and they don't

like being woken up.

If the oversized lizard won't go back to sleep you can force it to fall back to sleep, dart the big bozo till it's around 25% torpidity and make sure it's not actively fighting anything. The tranquilliser mixed with its lazy disposition should have the big fella snoozing again in no time.

Stats
