The Great Growth

*At this point (as I mentioned on the subreddit) the **easiest and fastest way** to make this subreddit grow would probably be to **continue going on robin and inviting more people over**.*

Also an easy thing to do is to tell people that you know who use reddit to come and visit the page. But in the end I really think that so far using robin will be the fastest method but in the future we will need to try and find different ways.
