

Gemini Chat History Cleaner

Chrome Extension — Privacy Policy

Effective Date: April 14, 2026

Version 1.5.2604

INDEPENDENT TOOL: Gemini Chat History Cleaner is an independent, third-party productivity extension created by an individual developer. It is not affiliated with, endorsed by, sponsored by, or in any way officially connected to Google LLC or any of its products, including Google Gemini. All product names, logos, and trademarks are property of their respective owners.

1. About This Policy

This Privacy Policy describes how Gemini Chat History Cleaner (the "Extension") handles information when you install and use it in your Google Chrome browser. We take your privacy seriously. This document is written in plain language so you always know exactly what is happening with any data related to your use of the Extension.

By installing or using Gemini Chat History Cleaner you acknowledge that you have read and understood this policy. If you do not agree with any part of it, please uninstall the Extension.

2. About Gemini Chat History Cleaner

Gemini Chat History Cleaner is a browser extension that adds a bulk-selection and bulk-deletion workflow on top of the Gemini web interface (gemini.google.com).

The Extension does the following entirely inside your browser:

- Injects a small checkbox next to each conversation listed in the Gemini sidebar.
- Displays a floating toolbar at the bottom of the page showing how many chats are selected and a "Delete selected" button.
- Injects a "Select all" checkbox above the conversation list so you can select every chat in one click.
- Shows a confirmation popup before any deletion is performed. When all chats are selected, a two-step confirmation is shown to prevent accidental deletion.
- Simulates the native Gemini delete flow (clicking the existing options menu and delete button) on your behalf for each selected conversation.

Gemini Chat History Cleaner does NOT: generate any content, store any data, make any network requests of its own, collect any analytics, or transmit any data to the developer or any third party.

3. Data We Collect

Short answer: We collect nothing. Absolutely zero data is ever stored, sent to us, or sent to any server we operate.

The Extension stores nothing in `chrome.storage.local`, `chrome.storage.sync`, cookies, IndexedDB, or any other browser storage mechanism. All actions performed by the Extension happen in real time within your active browser tab and are discarded the moment you navigate away or close the page. No information persists after a session.

4. Data We Do Not Collect

To be explicitly clear, Gemini Chat History Cleaner does NOT collect, store, transmit, or process any of the following:

- Your name, email address, or any other personal identifiers.
- Your Google account credentials, session tokens, or authentication data.
- The content, titles, or metadata of your Gemini conversations.
- Your browsing history, bookmarks, or any data from pages other than `gemini.google.com`.
- Device identifiers, IP addresses, or location data.
- Crash reports, analytics, usage statistics, or telemetry of any kind.
- Cookies from Google or Gemini.
- Any form of payment or billing information.

No servers: The developer of Gemini Chat History Cleaner operates no backend servers, databases, analytics pipelines, or data collection infrastructure of any kind. There is no account system and no sign-in required. The Extension is entirely self-contained in your browser.

5. Chrome Permissions — Why We Request Them

Chrome requires extensions to declare every permission they use. Here is exactly why each permission in the Extension's manifest is required:

Host permission — `gemini.google.com`

Required to inject the selection UI (checkboxes, toolbar, confirmation modal) into the Gemini web interface and to simulate clicks on the native Gemini delete controls. The content script runs exclusively on `gemini.google.com` and does not run on any other website. This permission does not give the Extension access to any other tab or any other website you visit.

No other permissions are requested. The Extension does not use: storage, tabs, cookies, history, bookmarks, `webRequest`, notifications, alarms, or any other Chrome API.

6. Third-Party Services

Gemini Chat History Cleaner operates as a UI layer on top of one third-party platform you already use:

6.1 Google Gemini

Gemini (operated by Google LLC) is an AI assistant web application. When you use this Extension on Gemini, you remain subject to Google's Terms of Service and Privacy Policy. Please review them at google.com/policies/. The Extension does not control Google's data practices and is not responsible for how Google handles data you have already shared with Gemini.

Important: Gemini Chat History Cleaner does not control, and is not responsible for, the data practices, content moderation, or account actions of Google LLC. If you violate Google's terms of service while using this Extension, the Extension bears no liability for any resulting account suspension or other consequences. Deleting a conversation through this Extension has the same effect as deleting it manually — the action is permanent and governed by Google's own data retention policies.

7. Trademark & Affiliation Disclaimer

Gemini Chat History Cleaner is an independent, community-made productivity tool. The following trademarks and service marks are the exclusive property of their respective owners:

- "Google" and the Google logo are registered trademarks of Google LLC.
- "Gemini" and associated branding are trademarks of Google LLC.

Gemini Chat History Cleaner has no formal relationship, partnership, sponsorship, or affiliation with Google LLC. The Extension is not officially endorsed or certified by Google. Use of these names in this document is solely for descriptive, nominative fair-use purposes to identify the service with which this tool is designed to work.

The Extension does not represent itself as an official product of Google and makes no claims to their intellectual property.

8. Your Rights & Control Over Your Data

Because Gemini Chat History Cleaner stores no data whatsoever, there is nothing to access, export, or delete on our end. You retain complete control at all times.

Right to Remove the Extension

You can uninstall the Extension at any time via Chrome Settings → Extensions. Uninstalling removes all associated code from your browser immediately and completely.

No Account Required

The Extension requires no registration, no login, and no email address. There is no user account to delete because none is ever created.

Control Over Deletions

Every deletion performed by the Extension requires your explicit confirmation through the in-browser popup. The Extension never deletes any conversation without your direct instruction.

Partial selections trigger a single confirmation step. Selecting all conversations triggers a two-step confirmation to help prevent accidental data loss.

9. Children's Privacy

Gemini Chat History Cleaner is not directed at children under the age of 13 (or 16 in the European Union). We do not knowingly collect any information from children. Because the Extension collects no personal data from anyone, no special measures beyond those described in this policy are required. If you believe a minor is using this Extension, please consult Google's age-restriction policies for Gemini.

10. Security

Because Gemini Chat History Cleaner stores no data, there is no stored data to protect. The Extension consists purely of a content script and stylesheet that are injected into the Gemini page when you visit it. No data is written to disk, no network connections are opened by the Extension, and no information outlasts your browser session.

The Extension does not implement any network endpoints, webhooks, or external API calls. All processing occurs locally within your Chrome browser process, exclusively on the Gemini page.

11. Transparency & Open-Source Intent

The source code of Gemini Chat History Cleaner is available for review. We encourage technically minded users to inspect the code directly to verify the claims made in this policy. The Extension consists of the following files, all of which run entirely in your browser:

- `manifest.json` — declares all permissions and extension metadata.
- `content.js` — the script injected into `gemini.google.com` that adds checkboxes, the toolbar, and the deletion flow.
- `styles.css` — the stylesheet that controls the visual appearance of the injected UI elements.

None of these files contain obfuscated code, tracking pixels, or hidden network requests.

12. Legal Rights, Fair Use & DMCA

Gemini Chat History Cleaner is a browser extension that assists users in performing actions they are already permitted to perform manually on the Gemini website. Specifically:

- It does not scrape, harvest, or republish content from Google or Gemini.
- It does not automate actions beyond what the user explicitly triggers through the extension UI.
- It does not circumvent any technical protection measures or access controls.
- It does not reproduce or redistribute copyrighted content.

Nominative Fair Use

The use of the names "Google" and "Gemini" in the Extension's store listing, documentation, and interface constitutes nominative fair use under trademark law: we use these names only to accurately describe the service our tool is designed to work with, not to suggest any affiliation or endorsement.

DMCA / Takedown Notices

If you believe Gemini Chat History Cleaner infringes your intellectual property rights, please contact us with:

- A description of the copyrighted or trademarked work you believe is being infringed.
- Specific identification of the material in the Extension you claim infringes your rights.
- Your contact information.
- A statement that you have a good-faith belief the disputed use is not authorised.

We will respond promptly to any legitimate, well-documented claims and take appropriate action where required by law. We reserve the right to contest claims we believe are factually incorrect, overly broad, or made in bad faith.

13. International Users & GDPR

Because Gemini Chat History Cleaner does not collect, store, or process any personal data on external servers — or anywhere at all — most data protection regulations (including the EU General Data Protection Regulation / GDPR, the UK GDPR, and the California Consumer Privacy Act / CCPA) do not impose direct obligations on this Extension with respect to data collection.

You remain the sole data controller of any data you have stored within your Google / Gemini account. If you have concerns about how Google handles your personal data under GDPR or CCPA, please consult Google's Privacy Policy at google.com/policies/.

14. Changes to This Policy

We may update this Privacy Policy from time to time as the Extension evolves. When we do:

- The "Effective Date" at the top of this document will be updated.
- Material changes will be noted in the Extension's Chrome Web Store changelog.
- Continued use of the Extension after any change constitutes acceptance of the updated policy.

We will never retroactively apply changes that are less privacy-protective than the policy in effect at the time you used the Extension.

15. Contact

Gemini Chat History Cleaner is developed and maintained by an independent developer. If you have any questions, concerns, or requests relating to this Privacy Policy, please reach out via the Chrome Web Store support tab for this Extension.

We are committed to addressing any legitimate privacy concerns promptly and transparently.

Gemini Chat History Cleaner is an independent tool. Not affiliated with Google LLC.
