### KEYWORDS

Font type Times News Roman, size 10pt and number of keywords not more than 5 keywords. Keywords, separated by a semi-colon, that can be used for indexing/abstracting purposes. Keywords should not repeat the title of the manuscript.

### ABSTRACT

**Introduction/Main Objectives:** Describe the topic your paper examines. Provide a background to your paper and why is this topic interesting. Avoid unnecessary content. **Background Problems:** State the problem or economic/business phenomena studied in this paper and specify the research question(s) in one sentence. **Novelty:** Summarize the novelty of this paper. Briefly explain why no one else has adequately researched the question yet. **Research Methods:** Provide an outline of the research method(s) and data used in this paper. Explain how you went about doing this research. Again, avoid unnecessary content and do not make any speculation(s). **Finding/Results:** List the empirical finding(s) and write a discussion in one or two sentences. **Conclusion:** Provide conclusion(s) and implication(s) of your research. What conclusions did you get and what are the implication(s)? What is the main take-home message?

*Manuscript should be written in MS Word file (Times New Roman, 10pt, Italic). Abstract should be written English, single space. Abstract is a summary that includes the background, objectives, methods, results, and conclusion in a clear and concise form. Word count for abstract should be 200 - 250 words. Abstract should be written in 1 (one) paragraph.*

Revision: dd-mm-yyyy

Accepted: dd-mm-yy

### Note:

1. The Article Max. of 15 pages
2. Article typed with margin: top 2 cm, left 2,5 cm, right 2,5 cm, bottom 2 cm
3. Paper size A4
4. This section must be separated with the main article

## INTRODUCTION

Manuscripts should be submitted in English as .docx attachments. Each paper should be single-spaced with wide margins, on one side only of the paper, preferably of A4 size, with pages in numbered sequence. The font used for the main body should be 12 pt Times New Roman. In introduction clearly explain the nature of the problem, previous work, purpose, and contribution of the paper. Ensure that your paper has been fully proofread before submitting it for publishing.

Authors should state the objectives of the work at the end of introduction section. Before the objective, Authors should provide an adequate background, and very short literature survey to record the existing solutions/method, to show which is the best of previous research, to show the main limitation of the previous research, to show what do you hope to achieve (to solve the limitation), and to show the scientific merit or novelties of the paper.

## LITERATURE REVIEW

Formats for the text and tables of your manuscript are .docx. Prepared using Microsoft Word or other word processors software. It is important that the file is saved in the native format of the word processor used. In particular, do not use the word processor's options to hyphenate words. Do not embed "graphically designed" equations or tables but prepare these using the word processor's facility. To avoid unnecessary errors, you are strongly advised to use the "spell-check" and "grammar-check" functions of your word processor.

The text should be as short and concise as possible, excluding anything, which is not directly relevant to the subject matter but including any associated safety, environmental or ethical issues. The text should be readily understood by practicing specialists. All statements and references should be correct and accurate. A speculative material must be clearly identified as such. The text should be in the third person and should avoid colloquialisms – texts originally prepared for oral presentation, therefore, will usually need to be rewritten. The text should not refer to the names of individuals, organizations, products, or services unless it is essential to understanding and then only appear once. Text must be neither gratuitously complimentary nor in any way derogatory about any person or organization. Principal participants in a project should be listed separately from the text in an Acknowledgement.

## RESEARCH METHODS

Explaining research chronological, including research design, research procedure (in the form of algorithms, pseudocode or other), how to test and data acquisition. The description of the course of research should be supported references, so the explanation can be accepted scientifically. It contains research design, population, sample, techniques of data collection and analysis.

## RESULTS AND DISCUSSION

The result of the article contains the data analysis written descriptively using Times New Roman 12. Tables and figures in each article is three (3) at most, B&W, not colorful. Discussion presents each of the findings compared to relevant theories or previous studies, actual facts, comments,

and reasonable analysis from researchers. The utilization of sub-chapter in discussion corresponds to the needs of discussion. For instance:

Sub Chapter 1 (Times New Roman 12, bold)

Sub Sub Chapter 1

Sub Sub Chapter 2

Sub Chapter 2 (Times New Roman 12, bold)

Sub Sub Chapter 1

Sub Sub Chapter 2

Sub Chapter 3 (Times New Roman, bold)

Sub Sub Chapter 1

Sub Sub Chapter 2

## Figures

Figures should be numbered consecutively (e.g., Figure 1, etc.). The caption should be center justified and placed under the figure.

Figure 1. IS Curve

## Tables

Tables should be arranged consecutively (e.g., Table 1, etc.). The caption should be (center justified) and placed above, as like the following example.

Table 1. The Growth of Islamic Banks and Conventional Banks Number Year 2013 – 2017

| Group of Banks         | 2013 | 2014 | 2015 | 2016 | 2017 |
|------------------------|------|------|------|------|------|
| Islamic Banks          | 11   | 12   | 12   | 13   | 13   |
| Conventional Banks     | 120  | 119  | 118  | 116  | 115  |
| Islamic Business Units | 23   | 22   | 22   | 21   | 21   |
| Islamic Rural Banks    | 163  | 163  | 163  | 166  | 167  |

## Mathematical Formula

Mathematical formulas should be numbered and clearly presented using microsoft

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left( a_n + b_n \sin \frac{n\pi x}{L} \right) f(x) = a_0 + \sum_{n=1}^{\infty} \left( a_n + b_n \sin \frac{n\pi x}{L} \right) \quad (1)$$

## CONCLUSION

It contains conclusion and suggestion. Conclusion briefly illustrates the results that address the hypotheses and/or research purposes or findings. It is the summary of the research and discussion, relevant to the findings, presented descriptively, not numeric. Suggestion provides things expected to conduct related to further ideas the research has proposed.

## REFERENCE

The main references are international journals and proceedings. All references should be to the most pertinent and up-to-date sources. Please use a consistent format for references – see examples below (12 pt). IRJBS use APA style as reference format writing. We suggest you to use Reference Management Software, MENDELEY. References should be published within the last 5 years.

**The style to be used is as follows:**

### Journal Article with Continous Paging:

Miller-Rushing, A.J., Primack, R. B., Primack, D.. & Mukunda, S. (2006). Photographs and herbarium specimen as tools to document phonological changes in response to global warming. *American Journal of Botany*, 93, 1667-1674.

**In-text reference:** (Miller-Rushing, Primack, Primack, & Mukunda, 2006)

### Journal Article when each issue begins with p.1:

Bogdonoff, S., & Rubin, J. (2007). The regional greenhouse ga initiative: Taking action in Maine. *Environment*, 49(2), 9-16.

**In-text reference:** (Bogdonoff & Rubin, 2007)

### Journal Article form a Library Subscription Service Database with a DOI (digital object identifier):

Mora, C., & Maya, M. F. (2006). Effect of the rate of temperature increase of the dynamic method on the heat tolerance of fishes. *Journal of Thermal Biology*, 31, 337-341.

doi:10.101b/jtherbio.2006.01.005

**In-text reference:** (Mora & Maya, 2006)

### Book with Single Author:
