California Community School Partnership Program Grant
Benefits of the Inflexion Navigation Dashboard Tool

The Inflexion Dashboard Navigation Tool is a **practical, research-based tool** designed to help school leaders guide meaningful, system-level change by grounding improvement in a shared identity and vision for readiness. **It breaks school transformation into five clear steps** — from establishing foundational purpose and shared goals to focusing on student-centered learning, transforming systems, and sustaining progress — so leaders can build coherent structures and aligned practices that support equitable outcomes for all students.

By anchoring decisions in a common understanding of who the school is and what it aims to achieve, the tool **helps teams move beyond isolated initiatives** to develop coordinated systems that reflect community priorities and elevate student voice and empowerment. It encourages collaboration with families and stakeholders, effective communication, and continuous reflection, giving leaders a roadmap to assess current practices, set priorities, and plan actionable steps toward long-term, **sustainable improvement**.

- Grounded in implementation science, the tool supports teams in [measuring growth over time](#) using the **Statements of the Ideal** — benchmarks developed with input from educators across the state to reflect high-quality community school practices.
- [Inflexion's Navigation Dashboard Tool](#) works like an Innovation Configuration Map because it helps schools clearly define what strong, effective practice looks like and where they are in relation to that vision. It breaks down school transformation into domains, and further **organizes those into actionable steps**.
- The dashboard aligns with the EL roadmap, MTSS, and [CCSPP framework](#).
- Central Coast region CCSPP grantees using the tool will support the Central Coast RTAC in identifying areas of strength and need across the region. Having this data handy will enable the Central Coast RTAC team to advocate for the Community Schools work at the State level, on behalf of grantees.

Additional key points related to the tool for Central Coast region CCSPP grantees:

- The Navigation Dashboard Tool is an optional tool made available to Central Coast region grantees and introduced to participants who complete the 1.0 and 2.0 Capacity Building series facilitated by Inflexion and hosted by the Central Coast RTAC.
- The benefits of Site and LEA teams using the Inflexion Navigation Dashboard Tool include:
 - The version of the Navigation Dashboard tool made available to teams at the 2.0 Capacity Building session is available to them indefinitely, at no cost.
 - If you have not completed the cycle of 1.0 and 2.0 sessions with inflexion, the digital version remains accessible to everyone. You can find the digital version in the Enable room for the 2.0 sessions linked below.
 - Materials shared at all 2.0 workshops this year can be found in [Workshop resources/Enable room](#) (2.0 sessions). The in-depth dashboard overview is with materials for Workshop #3 (slide 20 has a link in the notes section).

For non-Central Coast Region grantees that would like more information on the Inflexion Navigation Dashboard Tool, please contact Inflexion CPO, Manuel Colon at manuel.colon@inflexion.org
