

Subject Line: The Breakthrough Technique To Make 20%+ Per Year

Howdy,

The most common question I get from people is: How do I find a good stock?

Simple: Be EXTREMELY Picky.

A lot of investors simply find a company and invest in it without doing research or caring at all

They just think:

“It’s boring” or “It’s too much work”

But they make the #1 worst investing mistake time and time again, they don't understand what they're buying.

Now I get it, It is RIDICULOUS amount of work

But what if I told you there was a way that you could eliminate 98% of the research process and PREQUALIFY which companies you want to invest in?

Instead of making the same mistake over and over again

You could just have a short, simple list of companies that meet your standards

This same technique is used by Wall Street traders to make billions

It is the best kept investment secret in the world until now
