INTERESTED IN BEING A CAREER DAY PRESENTER?

One of Perrysburg High School's initiatives is to aid students in their career exploration and development in order to help them find that next step after graduation. One way we do this is to host an **Annual Career Day** every spring. This year's **Career Day at PHS** will be on **FRIDAY, MARCH 07, 2025**. During **Career Day**, PHS freshmen and sophomores will have the opportunity to explore career paths through breakout sessions facilitated by local professionals such as yourselves from various industries.

We are seeking professionals who would like to facilitate sessions, sharing their professional experience and career field knowledge. Breakout sessions will run from 11:20 a.m.- 3:25 p.m., comprising six 35-minute sessions. Professionals may register to present the whole day or may choose to present for only a few sessions. Presenters who are here the whole day will facilitate five sessions, with an additional session reserved for a lunch break. Each presenter will be accompanied by a support staff member to help with attendance and classroom management. This is an excellent opportunity to share what you know with PHS students and perhaps recruit future employees!

Technology Information

Due to technology availability, presenters are asked to bring their own computer that has an HDMI port or a dongle that accepts an HDMI cable, as well as their own HDMI cable (iPads tend to not be a good fit).

Presentation Information

The goal of Career Day is to provide students with exposure to a range of career opportunities, supporting their exploration and discovery of potential career paths. We invite presenters to share insights about their own professional journey, as well as key information about their industry.

Based on student feedback from previous Career Days, we highly encourage presenters to integrate some sort of interactive/ hands-on element into their presentations. Research shows that students retain information more effectively when actively involved in the learning process, and past events have demonstrated that the most impactful sessions are those that include participatory activities.
