Diagnostic & Dyslexia Screeners

District Name	What Approved Diagnostic Assessment is your District Using?	What Approved Dyslexia Screening Assessment is your District Using?	What Tier 2 Diagnostic Assessments are your district using? (local decision)	District Comments around assessment implementation, use, satisfaction, etc.?
Buckeye Central	iReady Diagnostic	iReady Diagnostic & Literacy Tasks		Very Satisfied
Carey	iReady Diagnostic	iReady Diagnostic & Literacy Tasks		Teachers completed the screener with help from Title 1 teachers. The literacy team went through and determined At Risk/ Some Risk/ No Risk (due to timelines and not being able to wait and have iReady produced a spreadsheet). We are not finding alignment with pseudoword benchmarks and Phonics First scope and sequence.
Colonel Crawford	iReady Diagnostic	iReady Diagnostic & Literacy Tasks		Satisfied
Elgin				
Fostoria	iReady Diagnostic	iReady Diagnostic & Literacy Tasks		This is our first year with iReady. So far the process has been fairly user friendly. We had Title I staff push into the classrooms to assist with administering the diagnostic for the first time alongside the classroom teacher. Title I teachers are pulling students to administer the Literacy Tasks. Only issue is we did not train everyone (only Title) due to time constraints before the start of school.

				We have training scheduled for 10/27 for all K-3.
Fremont	IReady Diagnostic	IReady Diagnostic & Literacy Tasks		The layout is very user friendly. The materials are easily accessible on their website. Our District created literacy task binders with all the information for each grade level. The Title 1 teacher along with our focus tutors administered the majority of the tasks. The program then creates a spreadsheet after the diagnostic and tasks are completed with information that is necessary to implement interventions for those “at risk/ some risk” students.
Hopewell				
Mohawk				
New Riegel	NWEA Map ELA MClass Amplify Dibels 8	MClass Amplify Dyslexia Screener		Very easy to give, analyze and progress monitor. Parent resources are also available.
North Union				
Old Fort	Aimsweb	Aimsweb		This platform is having us give 6 assessments to grades 1 & 2, followed by another dyslexia screener. It has taken a lot of time and has been very frustrating.
Ontario				
Pleasant	MClass Amplify Dibels 8	MClass Amplify Dyslexia Screener		We are very pleased with this so far. Easy to use. Data is easy to navigate and utilize to drive instruction. We’re also using mClass intervention and like what the early data is showing us (in terms of student growth).
Ridgedale	iReady	iReady Literacy Tasks		Overall a simple process and was easy

				to do. Classroom teachers gave the diagnostic within the classroom, Title Staff and myself surged into grade levels to give the literacy tasks (1 task for most grades, each take 1 - 2 minutes per student)
River Valley	iReady Diagnostic	iReady Diagnostic & Literacy Tasks		We like the use of iReady and are continuing to learn how to use the Literacy Tasks to do further dyslexia screening.
Seneca East	iReady	iReady Diagnostic and Literacy Tasks		
Shelby	NWEA MAP	Acadience		We like both platforms. Gives us some diff data points.
Tiffin	Acadience	Acadience	CORE: Assessing Reading Multiple Measures	We are pleased with Acadience. The main difficulty now is that we only have a core group trained to administer it, so those are the ones tasked with giving the initial test and now progress monitoring. We're trying to get classroom teachers trained to help. Overall, though, we feel the results are accurate and appreciate the one-on-one format.
Upper Sandusky				
Wynford	iReady Diagnostic	iReady Diagnostic Literacy Tasks	CORE: Assessing Reading Multiple Measures	It was a little confusing at the beginning with seeing the dyslexia screener and literacy tasks. Once they knew which to give things was an easy transition with progress monitoring with iReady - however, it would be helpful if it wasn't all paper pencil for that part.
