

Welcome to Zenith Project

With our community, we strive to provide a place for people to have fun, enjoy experiences, and create memories within the GMOD SCPRP community.

Here is a quick guide for getting started on our server.

New Player Guide

Written by the SMT

Five Basic Guidelines:

1: Respect Roleplay and read the room. If the tone is serious, don't make too many jokes. Try to keep breaking character to a minimum, as it could disrupt another player's RP.

2: Familiarize yourself with the rules. Even just quickly skimming through will give you further insight to how the server is run, and will help in not accidentally breaking rules.

3: If you have a question, never be afraid to ask. Our Staff Team is here to help, and if there's anything you need at any point, don't be afraid to make a ticket.

4: Use common sense, be respectful to others, and if you're unsure if something might be allowed, check the rules and/or contact staff for further clarity.

5: Have fun! While the RP in this server will take serious tones, it is built for fun. If you find yourself particularly stressed for long periods of time, it might be good to try something else within the server, or take a break from it entirely.

Branches:

Foundation

The Foundation serves as the main protecting force for humanity, specializing in the containment of anomalies. For this reason, they resort to secrecy to protect the world.

D-Class

Primarily composed of Death-Row inmates, they are used as disposable personnel for the purposes of testing and maintenance of SCPs.

General Security

General Security are the first faces you'll see throughout the facility. They mainly prioritize D-Block, but are seen throughout the entire site.

Medical

Medical is in charge of providing emergency medical aid in combative environments, performing surgeries, and aiding in the general wellbeing of Foundation personnel.

Research

Research can be considered the brains of the Foundation. Instead of defending with brute force. They develop countermeasures to provide containment to the anomalies.

Hammer Down

Hammer Down are the combative specialists to directly combat against the Insurgency. Whether that be defending raids, or embarking on one against the Insurgency. These are the frontline operatives.

Nine Tailed Fox

Nine Tailed Fox serves as the Foundation's Containment Specialist. You'll generally see them in the deeper areas of the facility, tending to anomalies and overall maintaining areas.

Last to Fall

[UNKNOWN]

Chaos Insurgency

The Chaos Insurgency is responsible for direct action against the Foundation to further build information to support their own ideals.

Research and Development

R&D works against the Foundation, using their work to weaponize anomalies to their own gain.

Black Watch

[EXPUNGED]
