

1. Script Writing & Story Planning

- Learn how to write short, engaging scripts for awareness campaigns
- Identify your target audience and message
- Use the **AI Script Writer** tool to instantly generate storyline ideas

2. Voice Overs & Narration

- Record your own voice-over directly inside the tool
- Explore AI-generated voices in multiple Indian languages
- Learn syncing techniques to match audio and animation

3. Character & Animation Design

- Use ready-made characters (adults, children, farmers, community workers, etc.)
- Animate actions such as walking, sitting, talking, and interacting
- Control expressions and gestures for storytelling impact

4. Backgrounds & Scene Creation

- Choose or generate realistic backgrounds using AI
- Learn to build multi-scene stories with transitions
- Add depth and realism using perspective and layering

5. Music, Sound & Visual Effects

- Add background music, ambient sounds, and sound effects
- Learn how to make scenes more emotional and powerful
- Add simple **visual effects** (rain, movement, motion blur, etc.)

6. Camera & Video Quality

- Learn camera movement and zoom controls to make videos dynamic
- Adjust frame composition and scene timing
- Export your animation in **HD or 4K quality** for YouTube or social media

7. AI-Based Video Generator

- Use AI-assisted features to create animation scenes automatically
- Understand how AI simplifies repetitive tasks and saves production time
