Akvelon Inc.

Position: Middle Mobile (iOS and Android) Software Development Engineer

About us

Akvelon Inc. (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest,** and many others). This is a great opportunity to learn from and work with leading engineers of world-renowned companies.

About project

Our client comprises seasoned technology and healthcare executives driven by social entrepreneurship, dedicated to developing products and services that positively impact human health. With decades of experience, this leadership team has successfully built innovative companies, including those focused on medical devices and the healthcare marketplace.

Our team is responsible for the development of mobile applications for different platforms and server-side components hosted in AWS for the healthcare sector. We are fully engaged in ensuring the service and apps operate seamlessly and securely.

In your role as a Mobile Software Development Engineer, you will take charge of both the Android and iOS applications, related to working with cloud services and data security. This is a highly collaborative role working to deliver valuable end-to-end solutions. The Mobile Developer will regularly communicate with the onsite Director of Engineering involved in the specification, delivery, and consumption of the client's offerings. In this hands-on role, you will develop, test, and improve our applications for iOS and Android.

As a team member, you will be self-directed, hands-on, and able to delve into the specific details of technical design. Under the guidance of the client manager, you will help drive critical implementation initiatives and support strategic and tactical decisions. Join us in making a real impact!

Responsibilities

- Develop mobile applications and participate in all development cycles, including testing, using best practices.
- Participate in continuous improvement exercises to enhance applications' performance, stability, and scalability.
- Proactively and effectively communicate with the client to understand their requirements, and ensure products are delivered successfully, with high quality, and in line with stated requirements and their vision.
- Keep up to date with software industry trends, healthcare technology services, scheduling software, mobile Android and iOS applications, and general Software Engineering best practices.
- Contribute to specification documents, mobile applications development, and externally facing technical documentation.
- Promote and champion industry and company standards for Software Engineering and data security.

Work Schedule

- Flexible schedule with coverage during morning hours (GMT+1);
- Evening meetings with the client (GMT+1);
- Client support during releases.

Requirements

- Proven experience in developing Android and iOS applications with proficiency in Kotlin and Swift;
- Hands-on experience with SQL and various databases such as PostgreSQL and Amazon RDS;
- Experience with all stages of mobile applications development lifecycle, including testing, deployment, and ongoing support;
- Excellent problem-solving skills and the ability to work in a dynamic, collaborative environment;
- High-level proficiency in English (C1);
- Ability to work directly under client management as an individual contributor.

Nice to have

- Experience with AWS;
- QA/SDET background.

Our benefits

- Paid vacation, sick leave
- Official state holidays
- Professional growth while attending challenging projects and the possibility to switch your role, master new technologies and skills with company support
- Flexible working schedule: 8 hours per day, 40 hours per week
- Personal Career Development Plan (CDP)
- Employee support program (Discount, Care, Heals, Legal compensation)
- Paid external training, conferences, and professional certification that meets the company's business goals
- Internal workshops & seminars
- Relocation support

Please send your resume / questions to our mail (career@akvelon.com).
We will be glad to see you in our team!
