Abstract

Abstract made in two languages, namely Indonesian and English. Abstract consisting of one paragraph, the number of words between 75-250 words. Abstracts should contain an introduction, methods, results and discussion, and conclusions unless the articles in the form of studies or reviews can be adjusted. The abstract does not contain a description of a mathematical and statistical language, and it does not include a quote, do not use abbreviations.

Keywords: keyword representing a maximum of 5 words writing

INTRODUCTION

(Paragraph 1) The introductory section contains background, and the literature review was used as the basis of research conducted, the research problem or hypothesis. Suppose the article is in the form of a study or review displaying issues, an analytical framework, and sub-sub-titles that can be tailored to the content of the research or review done. At the end of the introduction can also be written purpose of writing articles.

(Paragraph 2) The introductory section contains background, and the literature review was used as the basis of research conducted, the research problem or hypothesis. Suppose the article is in the form of a study or review displaying issues, an analytical framework, and sub-sub-titles that can be tailored to the content of the research or review done. At the end of the introduction can also be written purpose of writing articles.

(Paragraph 3) The introductory section contains background, and the literature review was used as the basis of research conducted, the research problem or hypothesis. Suppose the article is in the form of a study or review displaying issues, an analytical framework, and sub-sub-titles that can be tailored to the content of the research or review done. At the end of the introduction can also be written purpose of writing articles.

METHOD

(Paragraph 1) Write complete research procedures in this section. Write down all information such as design, participant, instrument, data analysis, database usage, etc. It can

be written in a paragraph or other form according to the research done. Examples are as follows;

(Paragraph 2) Write complete research procedures in this section. Write down all information such as design, participant, instrument, data analysis, database usage, etc. It can be written in a paragraph or other form according to the research done. Examples are as follows;

Etc.

The method part becomes optional and can be eliminated according to the article type.

RESULT AND DISCUSSION

Subtitles

(Paragraph 1) Contains the findings of the study in which the results and discussion are not done separation. The hope in this discussion, the author examines the findings and cross-reference with the review of theoretical and empirical studies. Written by systematic, critical analysis, and informative. The use of tables, images, etc, only supported clarify the discussion and confined to helping a genuinely substantial, e.g., statistical tables of test results, test results image models, and so on. Discussion of results to be argumentative regarding the relevance of the results, theory, previous research, and empirical facts are found and demonstrate the novelty of the findings. The use table is strongly recommended not too long, and if it is necessary to enter a long table is then created in the Annex.

(Paragraph 2) Contains the findings of the study in which the results and discussion are not done separation. The hope in this discussion, the author examines the findings and cross-reference with the review of theoretical and empirical studies. Written by systematic, critical analysis, and informative. The use of tables, images, etc, only supported clarify the discussion and confined to helping a genuinely substantial, e.g., statistical tables of test results, test results image models, and so on. Discussion of results to be argumentative regarding the relevance of the results, theory, previous research, and empirical facts are found and demonstrate the novelty of the findings. The use table is strongly recommended not too long, and if it is necessary to enter a long table is then created in the Annex.

Examples of presentation of tables and figures/graphics

Table 1. Statistics Description of Character Values of Responsibility Score

Group	Measurement time	Number	Average	Deviation Standard
Experiment	Pretest	21	59,19	12.061
	Posttest	21	75.67	14.964
Control	Pretest	26	70.19	10.756
	Posttest	26	67.88	8.189

Table 2. T-Test of Research Subjects' Intelligence

Source	F	Sig	
group	0.025	0.876	Not significant
gender	0.003	0.958	Not significant

CONCLUSION

This section contains the conclusions written in one or two paragraphs. The conclusion is written in essay form, not in numerical form. Conclusions should be an answer to the research question and are not described in the stats sentence. If you need to write down any suggestions or recommendations must be written together in the second paragraph.

FUNDING (OPTIONAL)

The authors have no funding to report.

ACKNOWLEDGMENTS (OPTIONAL)

The authors have no support to report.
