

STAR COURSE – Introduction to Animal Care and Careers with Animals 1 Day Workshop

Introduction to Animal Care and Careers with ZooVentures

ZooVentures offers students a unique opportunity to learn practical animal care skills and explore career options working with and for animals. Workshops are highly interactive with an emphasis on hands-on learning. Unusual animals are well represented, including reptiles such as bearded dragons, water dragons, leopard geckos, blue tongue lizards, turtles, and tortoises. There will also be dogs, chinchillas, rabbits, guinea pigs, and other small mammals, as well as newts, frogs, birds, and invertebrates.

Workshop topics include animal welfare, captive husbandry, enclosure design, animal handling, environmental enrichment, and animal careers, plus many other relevant topics.

Pet and exotic animal expert and zoology graduate, Sally Hibbard, facilitates the course. A guest dog handler will visit with a demonstration and career information. Sally's assistant is a veterinary nurse and professional dog trainer/behaviourist, so she will have valuable industry input also.

Certificate awarded on completion.

Venue	St Anne's Hall, 756 Beach Road, Browns Bay
Days	1-day workshop
Times	10 am – 3.30 pm
Requirements	Please bring lunch and a drink. If you are unable to make it on the day of the course, please phone Sally Hibbard on 027 2245987 (schools of non-attending students will be invoiced if not informed before the start of the course)
