Review Statement

[*Book Title*] was produced with support from the [Rebus Community](#), a non-profit organisation building a new, collaborative model for publishing open textbooks. Critical to the success of this approach is including mechanisms to ensure that open textbooks produced with the Community are high quality, and meet the needs of all students who will one day use them. Rebus books undergo both peer review from faculty subject matter experts and beta testing in classrooms, where student and instructor feedback is collected.

This book has been peer reviewed by [*insert number*] subject experts from [*insert number*] higher education institutions. [*Each chapter/The full-text/etc.*] received a [*single-blind/double-blind/open*] review from [*one/two/etc.*] reviewer, based on their area of expertise. The reviewers were largely [*academics/professionals/institutional staff*] with required specialist knowledge in [*specify concepts, topics, or fields in your discipline*].

Reviews were structured around considerations of the intended audience of the book, and examined the comprehensiveness, accuracy, and relevance of content. Reviews were also focused on relevance longevity, clarity, consistency, organization structure flow, grammatical errors, and cultural relevance. See the review guide [*please link to the appropriate review guide used for your project*] for more details. Changes suggested by the reviewers covered mainly [*specify areas here*] and were incorporated by [*describe how changes were made*].

[*List names of author(s), project manager(s), review coordinator(s)*] and the team at Rebus would like to thank the review team for the time, care and commitment they contributed to the project. We recognise that peer reviewing is a generous act of service on their part. This book would not be the robust, valuable resource that it is were it not for their feedback and input.
