

FINDING LOST LATESTNEWS

Try the following checks (your options will likely look different to mine!):

1. **Check your Junk folder:** If LatestNews is in there you need to add the details to your safe sender list. For example, find your Junk Email folder and if the BOA message has gone in there, click on the BOA email and then right-click and pick an option that applies.

2. **Check your virus checker:** Notice on the screen shot below I also have a Spam option in the Virus checker software. For example, find your Junk Email folder and if the BOA message has gone in there, click on the BOA email and then right-click and pick an option that applies.

3. **Add A Contact:** Add this email address webmaster@bavariaowners.co.uk as a contact on our phone and/or in your email programme.

4. **Link on the website:** The last LatestNews will now be in the new "News" page and also at the top of the "Events" page of the BOA website so if all else fails you can always pop onto the website and see what the latest news message said.

5. **Contact Us:** Finally, you can email me via the new “Contact us” link on the “About the BOA” website page.
