

Pokemon Conquest: Twin Dragons

Detailed Info Source

FAQ

Q - This effect of a warrior skill/move is inaccurate. Is it bugged?

A - Kind of? The effects themselves work, but their descriptions are inaccurate due to how something in the game internally works regarding how certain items are tied to descriptions. As such, since their descriptions are unable to be shown in game, their proper descriptions are shown here. If a description seems inaccurate, search for it here.

Q- Where can I submit my thoughts about this game, or any bugs I may encounter?

A- We have a survey that serves the purpose of both of these! Feel free to answer these to your heart's content (Do note, however, that the visual glitch on Illusio and Terrera with perfect link sprites, alongside the issue with Floating Rock Lv. 2 where you can clip out of bounds for a turn, are both known issues, so it would be best if you not report anything regarding this). Survey linked [here](#).

Q- How do I properly patch the game?

A- For a thorough guide on how to patch Twin Dragons, you can find it in the Google Drive linked here -

 [Pokemon Conquest: Twin Dragons - 2.1.3.1](#) . It will have a README.txt that offers multiple options on how to patch based on which ROM type you have, be it the Rev 1 version or 6094 version.

Q- Where can I find the changelog and balance log for the game?

A- This link [here](#) will take you to the changelog, and the link inside that will take you to the balance log! The balance log is for changes that affect game balance, while the changelog is for everything else (at current reading, the Balance Log hasn't quite been separated from the Changelog yet).

Q- How can I join in on competitive tournaments?

A- Join the [Twin Dragons Discord Server](#)! Tournaments are going to be held there every so often, and you don't need any sort of game progress to participate- just game prowess and utilization of this document to find out your team, and we'll set it up for you! Rulesets pertaining to tournaments are case-by-case basis (the current Twin Dragons ruleset is listed [here](#) but is prone to being updated soon), but if you want to host tournaments with any ROM Hack (or just the normal version) of Conquest yourself, here's a guide on how to do that [here](#) as well with a guide by WhatAUsernameIHave!

Ability Changes

- Shadow Dash has been changed to the name "Prankster".
- Black Hole has been changed to the name "Pressure".
- Confidence now raises Accuracy instead of Defense of nearby allies
- Thrust has been changed to the name "Momentum".
- High-rise has been changed to the name "Ambush".
- Climber has been changed to the name "Precision".
- Mood Maker has been changed to the name "Exhilarate".
- (This is experimental and may not work.) Deep Sleep also raises the Speed and Defense of the Pokemon.
- Guts now additionally raises Speed when the condition is met.
- Spirit now raises Accuracy instead of Attack.
- Tight Embrace is a new ability that works as a slight downgrade to Pressure, locking opponents to having 1 range if they are adjacent to a Pokemon with this ability.
- Sprint has been renamed to "Lightweight".

Move Ranges

In all diagrams, assume the Pokemon is facing to the right. These move ranges are those that have been created from scratch. **Blue** is where the Pokemon is, **Orange** is where the move hits, **Red** means if the move could hit there, it wouldn't show on the top screen, and **Pink** shows that the move hits there, just that it doesn't show on the preview on the top screen, and of course, **Gray** means it doesn't hit there. If it has **Blue** highlight and **Orange** text, it means the user hits itself in the attack.

Thank you all for making this ROM Hack possible. It brings me great joy that a project like this was able to come to fruition. Thank you

all for playing Pokemon Conquest: Twin Dragons!
