

JURNAL PENGABDIAN MASYARAKAT DALAM KESEHATAN

Jurnal Pengabdian Masyarakat dalam Kesehatan or also known as JPMK is a peer-reviewed open access scientific journal published by Universitas Airlangga and has obtained e-ISSN: 2721-0618.

TITLE

(The title should describe the summary of the research (concise, informative, no abbreviation, and maximum 12 words).

Author¹, Author² dan Author³

ABSTRACT

Introduction: One or two sentences of background and purpose of study.

Method: Describe the method, settings (please do not mention the actual location, but use geographic type or number if necessary); Participants (details of how selected, inclusion and exclusion criteria, numbers entering and leaving the study, relevant clinical and demographic characteristics).

Results: Report main outcome(s) /findings including (where relevant) levels of statistical significance and confidence intervals.

Conclusion: Should relate to study aims and hypotheses

Keywords: -- sorted alphabetically (From A to Z), and between keywords is associated with semicolon punctuation (;). 3-5 keywords.

Community; health; hypertension

1. INTRODUCTION

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Explain how you addressed the problem and clearly state the aims of your study. As you compose the introduction, think of readers who are not experts in this field.

Please describe in narrative format and not using sub-chapter..

2. METHOD

Explain in detail about the settings, time frame, variables, population, samples, sampling, instruments, method and data analysis,

3. RESULTS

Results should be presented continuously starting from the main result until supporting results. It also allowed to present diagram, table, picture, and graphic followed by narration of them. Hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil hasil

Tabel 1. Karakteristik Peserta Pengabdian Masyarakat

Gambar 1. Perbedaan Pengetahuan Masyarakat BHD Sebelum dan Setelah Pemberian Pengetahuan dan Pelatihan Melalui Metode Simulasi dan *Role play*

4. DISCUSSION

Describe the significance of your findings. Consider the most important part of your paper. Do not be verbose or repetitive, be concise and make your points clearly. Follow a logical stream of thought; in general, interpret and discuss the significance of your findings in the same sequence you described them in your results section. Use the present verb tense, especially for established facts; however, refer to specific works or prior studies in the past tense. If needed, use subheadings to help organize your discussion or to categorize your interpretations into themes. The content of the discussion section includes: the explanation of results, references to previous research, deduction, and hypothesis.

5. CONCLUSION

Conclusion should be explained clearly related to hypothesis and new findings. Suggestion might be added containing a recommendation on the research done or an input that can be used directly by the consumer.

6. REFERENCES

The author-year notation system is required and completed. All references mentioned should be written down in reference using American Psychological Association (APA) 6 th edition style and arranged from A to Z. Articles have minimal 25 recent references (last 10 years) and 80% is journal. References from journal publication should be provided by DOI. All cited references must be mentioned in in-text citations.
