

Linphone for iOS (iphone & ipad)

Step 1.

Open the Linphone application. You should see a screen like this to start:

Click start on the right of the screen and you will then see a screen like this:

Choose the last item at the bottom "I have already a SIP account".

Account setup assistant

Enter your username and password with your SIP domain.

Username

Password

Domain

Sign in

Now we will setup your account.

1. Now click Username and enter your C9VoIP username if using residential service or your extension number if you are using business service.
2. Next click Password and enter your password.
3. Next, click Domain and enter either sip.c9voip.com for residential service or your C9VoIP Cloud PBX server address if you are using business service.
4. Now click Sign in at the bottom

Enter your username and password with your SIP domain.

ABC ABC

After clicking Sign in, your account is created. You should be able to back out to the dialer

screen that looks like this:

That's it. Your account should say Registered as shown above. Now you can make calls using your C9VoIP service! You can click settings to adjust your codecs as needed but your account should now be ready to use after following the steps above.
