I will work on your commission until it is VRM/VRChat Ready and gets approval from you. After that point, I will send you a finished invoice through PayPal. Once payment is received, you will have access to the unity file. If you like, I can also upload the avatar onto VRChat for you. Keep in mind if I upload it for you, quick fixes are much easier for me to do.

If the model is SFW I will stream its creation process. If it has NSFW sections, I will stream the SFW portions and time my offscreen work during NSFW parts. You can watch and see how it's going by watching me on

By commissioning me you are agreeing that you are paying for the service of making the model with the understanding you have rights to use the character, either as your own OC or you have permission from the original creator. When I am finished and give you the model, you do not have permission to re-sell the model unless agreed upon. If this is something you are interested in, please talk with me and we can work something out.
