2021 TREE DESCRIPTIONS

Limited number of Bundled Trees available.

Downy serviceberry (Amelanchier arborea) is an early-flowering, large shrub or small tree which typically grows 15-25' tall in cultivation. Its early summer fruits

The **Redbud (Cercis canadensis)** grows from 20 to 30 feet tall and wide at maturity. This tree grows at a fast rate of about 2 feet per year under ideal conditions. The **Eastern Redbud** is a stunning spring bloomer that is native to North America. These trees grow well in full sun or part shade. However, you will get the heaviest blooming from trees in full sun.

a frequent nesting does best with

Arborvitae trees, also known as 'Smaragd' due to their Danish origins, grow in a narrow pyramid shape, eventually to 10-15 feet tall and 3-4 feet wide. Their size makes them ideal foundation plants and natural privacy screens in smaller yards and narrow spaces. These trees can grow up to 1-2 feet per year until established and then grow 6-9 inches per year. Arborvitae trees' dense green, scale-shaped foliage is colorful year-round and fans out in feather-like sprays.

st-growing evergreen conifer which can
up to 1,000 years. They are tall and
ular appearance, with a pointed crown.
opery grey-brown and appears smooth
ry scales. Mature trees (over 80 years
-brown bark, with cracks and small plates. Twigs are orange-brown, grooved and hairless. Can grow 2-3' per year. At mature height can be 40-60'.

Colorado Blue Spruce (Picea pungens 'glauca') is a majestic evergreen when planted as a specimen tree or as a group. It is native to North America. The blue

Fraser Fir (Christmas Tree) Admired for its symmetry, fresh fragrance, and strong branches. This evergreen feature dark blue-green needles with a silvery underside that glistens in the light. They grow best in cool, moist, well drained soils that are sheltered from drying winds. They light full sun and can reach heights of 40-60' and a spread of 25-35'. Great for wildlife habitats!!

Mature height is
