

Privacy Policy for Photo Editor: Blur & Filters

Effective Date: September 24, 2026

Last Updated: September 24, 2026

This Privacy Policy applies to the mobile application **Photo Editor: Blur & Filters** (hereinafter referred to as the "Application", "App", or "Service"), developed by **Hamza** ("we", "us", or "our").

We are committed to protecting your privacy and ensuring you have a secure user experience. This Privacy Policy explains our practices regarding user information and image data when you use our Application.

1. Summary (Privacy First Architecture)

- **Zero Data Collection:** We do not collect, transmit, store, or sell any personal data or personally identifiable information (PII).
- **100% On-Device Processing:** All image modifications, filters, adjustments, and background blur effects are processed entirely locally on your device hardware.
- **No Cloud Uploads:** Your photos never leave your device and are never sent to external servers or cloud services.
- **No Account Required:** You do not need to register, log in, or provide an email address to use any feature of the App.

2. Information We Do Not Collect

When using the Application, we do not collect:

- Names, email addresses, phone numbers, or contact details.
- Precise or coarse geolocation data.
- Device identifiers (IMEI, MAC address, Advertising IDs).
- Financial or payment data.
- Any biometric data or facial recognition templates.

3. Image Processing and On-Device Machine Learning

The Application utilizes **Google ML Kit's Selfie Segmentation API** to perform subject isolation and apply background blur ("portrait mode" effects).

- **On-Device Inference:** Machine learning inference is performed entirely on your device's processor using local models.

- **No Biometric Data Generated:** The segmentation process merely detects pixel boundaries between a foreground subject and the background. It does **not** identify who the person is, map facial geometry for recognition, or generate biometric signatures.
- **Temporary Memory:** Selected images are held temporarily in local device memory (RAM) solely for the duration of your editing session and are discarded as soon as you close or reset the editor.

4. Device Permissions Used

The Application requests only the essential Android runtime permissions strictly necessary to deliver its core editing capabilities:

1. **Camera ([android.permission.CAMERA](#)):**
 - *Purpose:* Allows you to take a new photograph from within the app to edit immediately. We never access your camera without your explicit action.
2. **Photos and Media / Storage ([READ_MEDIA_IMAGES](#) / [READ_EXTERNAL_STORAGE](#) / [WRITE_EXTERNAL_STORAGE](#)):**
 - *Purpose:* Allows you to select photos from your device gallery for editing and to save your exported, edited pictures back to your device storage.

5. Third-Party Services and Analytics

- **No Ads:** The Application contains no advertisements and integrates no ad-network SDKs.
- **No Third-Party Analytics:** We do not include third-party tracking, profiling, or behavioral analytics tools (e.g., Firebase Analytics, Facebook SDK).
- **Social Sharing:** When you choose to use the "Share" button, your exported image is transferred directly via your device's native operating system share dialog to the app you select (e.g., WhatsApp, Instagram, email). We have no access to your destination app or shared content.

6. Children's Privacy

The Application does not address anyone under the age of 13, nor does it knowingly collect any personal information from children. Because our application does not collect any personal data whatsoever, it is fully safe for general audiences.

7. Security of Your Data

Because all data and images remain on your personal device, the security of your photographs depends on your device's own physical security and lock screen

settings. We do not maintain any external databases or cloud endpoints that could be compromised.

8. Changes to This Privacy Policy

We may update our Privacy Policy from time to time. Any changes will be posted on this page with an updated "Effective Date". We encourage you to review this policy periodically.

9. Contact Us

If you have any questions, concerns, or suggestions regarding this Privacy Policy or the Application, please contact us at:
