

APPROACHES FOR ECONOMIC DEVELOPMENT

Today's lesson is going to be spent learning about economic pathways to development.

Your Task: You must research and find a case study that involves a country trying to pursue economic development. It might be best to focus on developing countries rather than MECDs. You will write a maximum of one page that critiques/reviews this country's path and plan for economic development from **EITHER** a Liberalist perspective **AND/OR** a Neomarxist perspective.
