

SCG Video Creation and Edit program. Wil Wakely 1/29/22

I needed to create a promo video of myself – quickly, within the next hour. Not only are Google and Alexa my intelligent mentors, but YouTube often comes to the rescue.

From YouTube I discovered that Win10 has a built-in Camera app for Photo or Video recording. Just click on Camera in the computer apps listing. Watch YT video to see how:

<https://www.youtube.com/watch?v=rszcBS0jSBA> 4:41 min

Next, I needed to edit the video I made. Sure enough, Win10 has a built-in Video Editor. Enter Video Editor in the computer search box to launch the program.

Watch YT video comparing 5 free video editors:

<https://www.youtube.com/watch?v=iB8PK2POssE> 16 min

Now I needed to edit the video that I made. Watch YT video of an actual video creation with the Win10 editor:

<https://www.youtube.com/watch?v=t6yQwLuoO3w> 28 min

It is somewhat intuitive, but watching the video helps a lot.

Advanced video creation. How to create a video of the Monitor and Camera at the same time.
