UNETHICAL USE

- ASSIGNMENT OUTSOURCING**
Using AI to create assignments, essays, or projects without any personal input or understanding undermines the learning process and is considered academic dishonesty. This is the same as a tutor or parent creating your work and you claiming it as your own.
- MISREPRESENTING ABILITIES**
Using generative AI to complete tasks that are beyond your understanding and presenting the results as your own. This is the same as copying someone's assessment or paragraph and tweaking it to make it look different.
- IMPROPER REFERENCE CHECKING**
Asking to source references and not checking the validity of the information and relevance. Example: Claiming this is where you sourced information, but you only used ChatGPT
