JD For UX Designer & UI Developer

Job Title: UX Designer & UI Developer
Company: [Company Name]
Location: [City, State]

Job Description:

The UX Designer & UI Developer will be responsible for designing and developing user-centered digital products. This includes creating wireframes, prototypes, and high-fidelity mockups, as well as coding and implementing the final user interface. The role also includes conducting user research, usability testing, and analyzing user data to inform design decisions.

Key Responsibilities:

- Design and develop user-centered digital products
- Create wireframes, prototypes, and high-fidelity mockups
- Code and implement the final user interface
- Conduct user research, usability testing, and analyze user data
- Collaborate with cross-functional teams to ensure a seamless user experience
- Stay up-to-date with the latest trends and best practices in UX and UI design
- Continuously improve and iterate on existing products

Competency Requirements:

- Strong understanding of user-centered design principles
- Strong skills in wireframing, prototyping and UI design tools
- Strong coding skills in HTML, CSS, and JavaScript
- Strong problem-solving and analytical skills
- Strong written and verbal communication skills
- Strong attention to detail
- Ability to work in a collaborative environment

Qualifications:

- Bachelor's degree in Graphic Design, Human-Computer Interaction, or a related field
- Strong experience in UX design and UI development
- Strong portfolio of relevant work

- Strong experience with design and prototyping tools (e.g. Sketch, Figma, Adobe XD)
- Strong understanding of web technologies and best practices
- Strong understanding of accessibility and inclusive design principles
