

AAA GAME ART STUDIO

Test task “Senior 2D Background Artist (Casual)”

TEST BACKGROUND

Test task:

Create a Nordic background based on Scandinavian mythology.

What should be shown in the background:

The main character, around whom some action develops. He may be in the distance or be the center of the composition, but that background should tell the story associated with Scandinavian mythology. Night, northern lights, snow-covered trees, iced lake and viking village.

Style:

The style is casual, soft, with neat shapes and detailed textures, clean bright colors (no burnt or dirty ones). The background should look complete, without an abundance of details and drawing every pixel, but not create the impression of a sketch or a quick drawing.

Size: 3000x2500 pixels

References of the desired performance style:
